Part I: Bihar as a whole

In short

69,10,559
names left off the draft or deleted after it

13.9%
of all votes polled in 2025

174 of 243
seats where the names left off or deleted exceed the margin

55.5%
of those left off or deleted are women

The Special Intensive Revision, a fresh check of every name on the electoral roll, left off or deleted 69,10,559 names from Bihar's roll in 2025. 65,59,409 were left off the draft roll of 1 August, the first published version of the revised roll, and this report calls that phase 1. 3,51,150 more were deleted after the draft, before the final roll of 30 September, published after the hearing of claims and objections, and this report calls that phase 2. The total comes to 9.25 names for every 100 electors on the 2025 roll, across 77,837 polling booths in 243 constituencies. These totals count women and men, and the phase 1 lists also leave off 217 third-gender electors. In the Assembly election that followed in November, 4,96,29,071 votes were polled. The names left off or deleted equal 13.9% of them, one for every 7.2 votes cast.

A seat's winning margin is the number of votes by which its winner beat the runner-up. The names left off or deleted are larger than the winning margin in 174 of 243 constituencies. They exceed the combined winning margin of all 243 seats, 51.4 lakh, by a factor of 1.34, and they exceed the combined winning margin of the NDA across the 202 seats it won, 46.7 lakh. In 66 of the 87 seats the NDA took from INDIA, more names were left off or deleted than the NDA won by.

Women are 55.5% of the names left off or deleted and 47.9% of the roll before the revision, and their share of those names is higher than their share of the roll in 38 of 38 districts. The roll records each elector's sex, so this figure is a count and involves no guessing.

Names left off or deleted, and coverage

The booth lists cover every one of Bihar's 77,837 polling booths. The table gives each district's names left off or deleted, its rate per 100 electors on the 2025 roll, and its share of the state total. Counting per 100 electors puts a large district and a small one on the same scale.

District	Seats	Names left off or deleted	Per 100 electors	Per booth	Share of state
Gopalganj	6	3,14,853	17.31	154.2	4.6%
Purnia	7	2,99,452	14.30	123.8	4.3%
Kishanganj	4	1,56,727	13.92	123.5	2.3%
Madhubani	10	3,61,114	11.55	104.8	5.2%
Bhagalpur	7	2,53,818	11.35	108.0	3.7%
Saharsa	4	1,39,670	10.76	94.7	2.0%
Sitamarhi	8	2,52,512	10.25	95.9	3.7%
Samastipur	10	2,93,199	9.96	92.0	4.2%
Katihar	7	2,06,621	9.93	85.8	3.0%
Saran	10	2,88,515	9.88	89.9	4.2%
Sheohar	1	28,685	9.41	88.8	0.4%

District	Seats	Names left off or deleted	Per 100 electors	Per booth	Share of state
East Champaran	12	3,23,982	9.40	90.1	4.7%
Bhojpur	7	1,97,931	9.35	84.8	2.9%
Siwan	8	2,28,135	9.28	87.3	3.3%

Patna	14	4,15,580	8.58	80.7	6.0%
Gaya	10	2,53,055	8.44	75.3	3.7%
Banka	5	1,21,034	8.31	75.0	1.8%
West Champaran	9	2,17,300	8.26	70.2	3.1%
Munger	3	82,185	8.19	72.4	1.2%
Jamui	4	1,00,975	7.92	69.0	1.5%
Madhepura	4	1,04,304	7.65	72.5	1.5%
Nawada	5	1,30,263	7.55	70.3	1.9%
Khagaria	4	85,658	7.32	66.6	1.2%
Darbhanga	10	2,10,711	7.28	69.0	3.0%
Buxar	4	93,120	7.19	65.9	1.3%
Jehanabad	3	57,619	7.09	59.1	0.8%
Rohtas	7	1,57,939	7.06	66.1	2.3%
Lakhisarai	2	51,608	6.88	64.7	0.7%
Kaimur	4	78,779	6.71	58.7	1.1%
Nalanda	7	1,48,457	6.60	57.9	2.1%
Arwal	2	32,872	6.23	53.6	0.5%
Sheikhpura	2	27,148	5.47	49.2	0.4%

The names left off or deleted range from 5.5 per 100 electors in Sheikhpura to 17.3 in Gopalganj. Among constituencies the range is wider, from 4.4 in Darbhanga to 23.6 in Purnia.

Names left off or deleted against the margins and the votes polled

The names each constituency had left off or deleted are compared with two figures from the November 2025 election, the margin by which the seat was won and the votes polled. The comparison makes no claim that these electors would have voted, or how. It measures the size of the revision next to the vote that decided each seat.

174 of 243
seats where the names left off or deleted exceed the margin

30
seats where the names left off or deleted are five times the margin or more

68
seats where the names left off or deleted exceed 15% of votes polled

27
smallest margin (Sandesh)

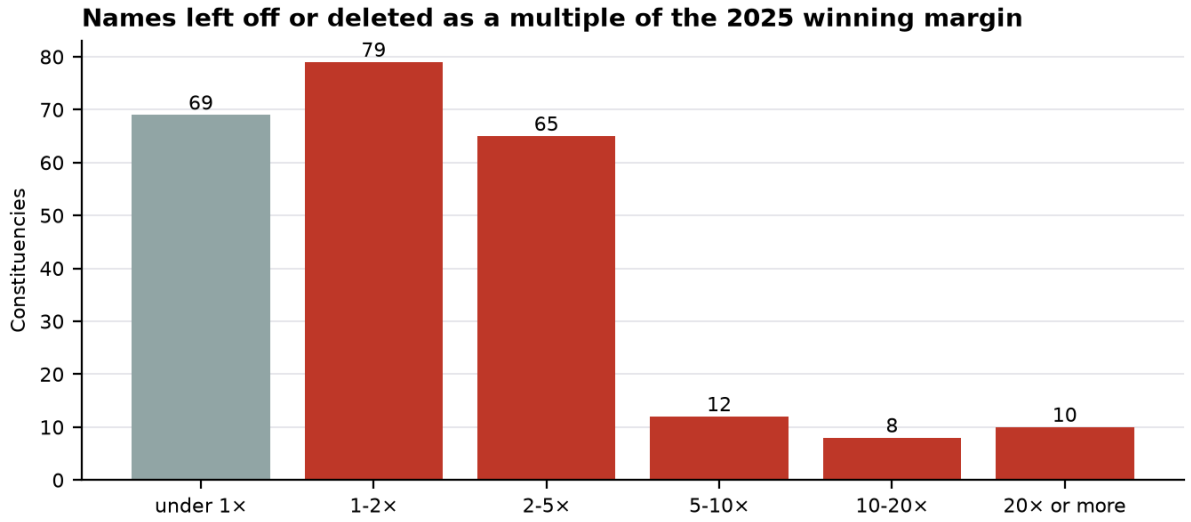

Figure 1. Constituencies by names left off or deleted ÷ 2025 winning margin. Grey bars are seats where those names were below the margin.

Constituency	District	Won by	Margin	Left off or deleted	Less margin	× margin	% of votes polled
192 Sandesh	Bhojpur	JD(U) (NDA)	27	25,665	+25,638	950.6×	14.1%
203 Ramgarh	Kaimur	BSP (Other)	30	19,225	+19,195	640.8×	9.9%

7 Chanpatia	West Champaran	INC (INDIA)	602	14,829	+14,227	24.6×	6.8%
229 Bodh Gaya	Gaya	RJD (INDIA)	881	17,168	+16,287	19.5×	7.5%
1 Valmiki Nagar	West Champaran	INC (INDIA)	1,675	31,543	+29,868	18.8×	13.8%
180 Bakhtiarpur	Patna	LJP(RV) (NDA)	981	17,924	+16,943	18.3×	9.3%
12 Narkatiya	East Champaran	JD(U) (NDA)	1,443	23,783	+22,340	16.5×	10.9%
231 Tikari	Gaya	RJD (INDIA)	2,058	33,447	+31,389	16.3×	15.8%
75 Saharsa	Saharsa	IIP (INDIA)	2,038	28,198	+26,160	13.8×	10.9%
201 Dumraon	Buxar	JD(U) (NDA)	2,105	22,651	+20,546	10.8×	11.6%
77 Mahishi	Saharsa	RJD (INDIA)	3,740	39,143	+35,403	10.5×	19.8%
120 Amnour	Saran	BJP (NDA)	3,808	37,843	+34,035	9.9×	22.7%
232 Belaganj	Gaya	JD(U) (NDA)	2,882	27,917	+25,035	9.7×	13.6%
27 Bajpatti	Sitamarhi	RLM (NDA)	3,395	31,190	+27,795	9.2×	14.2%
213 Karakat	Rohtas	CPI(ML)L (INDIA)	2,836	25,162	+22,326	8.9×	12.9%
218 Makhdumpur	Jehanabad	RJD (INDIA)	1,830	14,829	+12,999	8.1×	9.0%
199 Brahampur	Buxar	RJD (INDIA)	3,220	24,989	+21,769	7.8×	12.1%
72 Singheshwar	Madhepura	JD(U) (NDA)	2,982	22,947	+19,965	7.7×	10.2%

The 25 constituencies where the names left off or deleted were largest against the margin. Sandesh was won by 27 votes and lost 25,665 names.

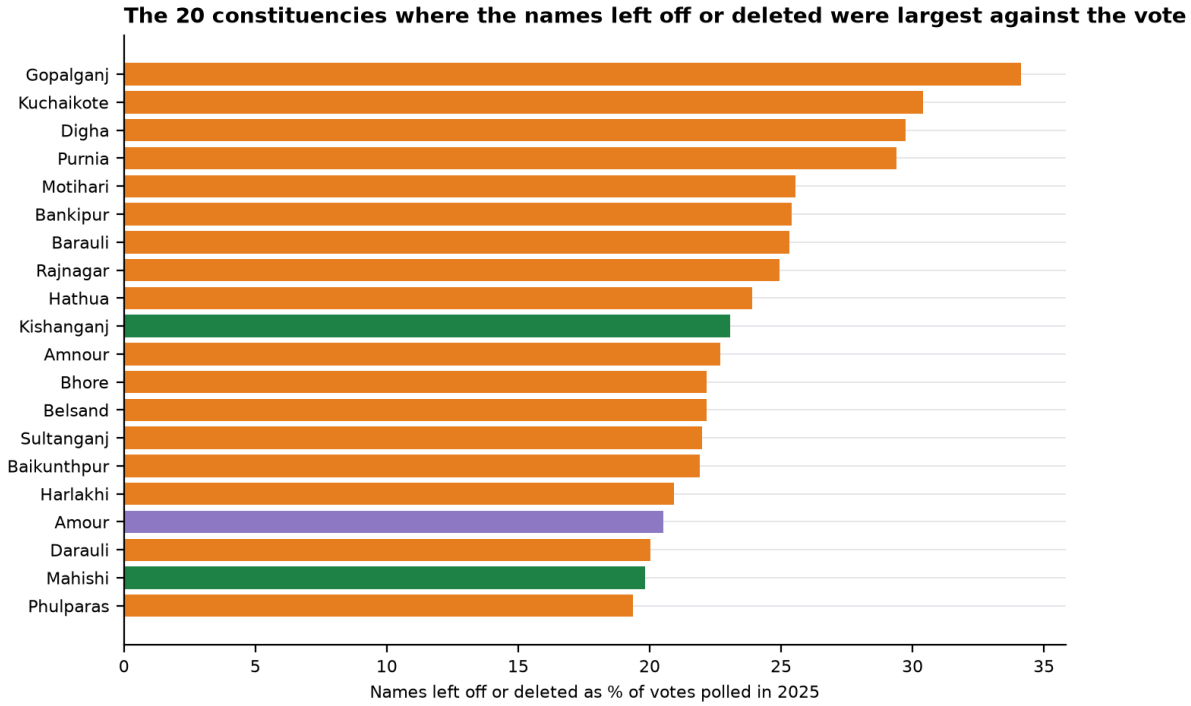

Figure 2. Colour marks the alliance that won the seat in 2025: orange NDA, green INDIA, purple neither.

Across Bihar the names left off or deleted equal 13.9% of the votes polled. In 68 constituencies they equal more than 15%, in 18 more than a fifth, and in Gopalganj they reach 34.1%. In Digha the names left off or deleted exceed the runner-up's entire vote. In no constituency do they exceed the total votes polled.

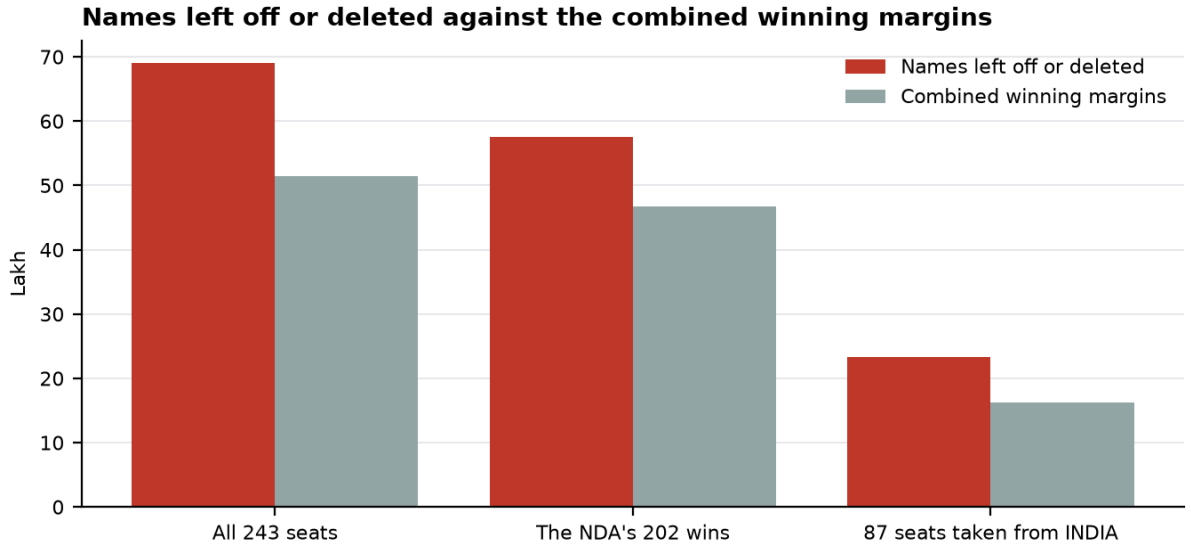

Figure 3. In lakh. The combined margin of a group of seats is the sum of each seat's margin of victory.

Could the names left off or deleted have changed who won?

A name left off or deleted is not a vote lost to one side. Some of those people had died, many would not have voted, and those who would have voted would have split between the parties. Each seat's count here is the names still off the final roll, less those entered as dead, at the seat's 2025 turnout. That comes to 21,54,727 electors across Bihar. That count is low, because the names added after the draft include new electors, so every estimate is also run on all the names left off or deleted, with nothing added back (32,59,393).

In 56 of 243 seats the electors left off or deleted who would have voted were enough to change the result had they backed the runner-up. In 7 of them a lean of under 55% would have done it (Sandesh, Ramgarh, Nabinagar, Agiaon, Balrampur, Dhaka and Forbesganj). That share, the part of those voters the runner-up would have needed, is called the break-even figure below. In the other 187 seats the margin was larger than every vote of those left off or deleted put together. This is the one figure that needs no assumption about how anyone votes.

The lists do not say how those left off or deleted would have voted. Going by how their own polling booths voted in 2024, in the 228 seats the two alliances fought each other, those who would have voted lean 49.0% NDA, 37.8% INDIA and 13.2% other parties. On that reading 4 seats would have changed hands counting only the names still off the final roll (Sandesh to RJD, Agiaon to CPI(ML)L, Nabinagar to RJD and Forbesganj to BJP), and 6 counting every name left off or deleted (Sandesh to RJD, Agiaon to CPI(ML)L, Nabinagar to RJD, Forbesganj to BJP, Chanpatia to BJP and Saharsa to BJP).

Weighting instead by how Muslims and others, or women and men, voted in the Axis My India exit poll, Bihar Assembly election 2025, as reported by NDTV on 12 November 2025, 1 and 2 seats change hands on the high count (Jehanabad to JD(U) on religion, and Dhaka to BJP and Forbesganj to BJP on sex). On every estimate the NDA keeps between 200 and 204 of the 243 seats.

Seats where the winner or runner-up is outside the two alliances get the break-even figure only, because the booth results and the poll both count every other party together. Two of those were close. They were Balrampur (LJP(RV) over AIMIM by 389) and Ramgarh (BSP over BJP by 30).

Constituency	Winner / runner-up	Margin	Left off or deleted who would have voted	Share the runner-up needed	Booth estimate, net to runner-up
192 Sandesh	JD(U) / RJD	27	7,601	50.2%	802
203 Ramgarh	BSP / BJP	30	4,846	50.3%	
221 Nabinagar	JD(U) / RJD	112	7,047	50.8%	907
195 Agiaon	BJP / CPI(ML)L	95	5,543	50.9%	623
65 Balrampur	LJP(RV) / AIMIM	389	14,058	51.4%	
21 Dhaka	RJD / BJP	178	4,823	51.8%	-632
48 Forbesganj	INC / BJP	221	6,158	51.8%	1,325
116 Taraiya	BJP / RJD	1,329	11,742	55.7%	-1,285
1 Valmiki Nagar	INC / JD(U)	1,675	11,819	57.1%	874
216 Jehanabad	RJD / JD(U)	793	4,830	58.2%	-484
231 Tikari	RJD / HAM(S)	2,058	11,065	59.3%	-428
12 Narkatiya	JD(U) / RJD	1,443	6,757	60.7%	-68
229 Bodh Gaya	RJD / LJP(RV)	881	4,006	61.0%	279
77 Mahishi	RJD / JD(U)	3,740	15,673	61.9%	1,106
7 Chanpatia	INC / BJP	602	2,486	62.1%	384
120 Amnour	BJP / RJD	3,808	15,381	62.4%	-1,996
180 Bakhtiarpur	LJP(RV) / RJD	981	3,933	62.5%	16
75 Saharsa	IIP / BJP	2,038	8,088	62.6%	1,205
232 Belaganj	JD(U) / RJD	2,882	10,052	64.3%	-94

Each estimate assumes something the lists cannot show. People marked shifted may vote where they now live, people who moved may vote less than their neighbours, and an exit poll carries its own error. None of it can say whether any name was rightly left off or deleted.

Did the vote move where more names were left off or deleted?

Between the 2020 and 2025 Assembly elections the NDA parties gained votes across Bihar. If the names left off or deleted had taken away more of INDIA's voters than the NDA's, INDIA's share should have fallen most where the most names came off the roll. The candidate-wise results for both elections were counted with the parties grouped as they stood in 2025: BJP, JD(U), LJP(RV), HAM(S) and RLM for the NDA, and RJD, Congress, the three Left parties, VIP and IIP for INDIA.

Seats	Number	Left off or deleted per 100, average	Change in NDA share, points	Change in INDIA share, points	Change in NDA lead, allowing for 2020	Growth in votes cast
Fewest names lost	81	6.7 (4.4 to 7.9)	+2.9	-2.9	+5.2	+18.8%
Middle	81	8.9 (7.9 to 9.7)	+4.0	-1.1	+4.0	+20.0%
Most names lost	81	12.2 (9.7 to 23.6)	+3.1	+0.2	+4.7	+18.5%

Once each seat's 2020 result is allowed for, the NDA's lead over INDIA grew by between 4.0 and 5.2 points in each third, about the same whether a seat lost few names or many. Before that allowance INDIA seemed to lose most where the fewest names were left off or deleted (-2.9 points against +0.2), and part of that is seats giving back in 2025 what they had gained in 2020. Votes cast grew by about the same amount in all three. Comparing each seat only with other seats in its own district, and allowing for its 2020 result, each extra name left off or deleted per 100 electors went with a change of +0.31 points in the NDA's lead, most likely somewhere between -0.27 and +0.89. Had every person left off or deleted who was alive and would have voted voted against the NDA, its lead should have grown by about 0.66 points more for each extra name left off or deleted per 100 electors, and by about 0.33 if three in four of them had. That range takes in no effect at all and both of these, so the vote cannot tell whether the names left off or deleted cost INDIA its voters. Without the allowance for 2020 the figure is -0.83 (between -1.86 and +0.20). The two models disagree even on the direction, which is itself a reason to read little into either.

This asks only whether leaving names off or deleting them moved votes between the alliances. It cannot say whether each name was rightly left off or deleted, and a voter wrongly left off the roll has lost a vote whichever way it would have gone. A small lean either way would not show, and five years separate the two elections, in which LJP rejoined the NDA, VIP changed sides and Jan Suraaj entered.

After the final roll

The final roll of 30 September 2025 was published after the claims and objections on the draft were heard. A claim asks for a name to be added or put back, and an objection asks for one to be deleted. Format 4B, the Election Commission's standard return for a final roll, gives seat by seat and by sex the names added and deleted after the draft and the final roll itself. It agrees with the press note of the Chief Electoral Officer, the Commission's officer in charge of the state's rolls. The roll of June 2025 is published only as a state total, so a seat's roll before the revision is taken here as its draft roll plus the names on its phase 1 list.

21.5 lakh
added after the draft

3.7 lakh
deleted after the draft

27.2%
of the names left off the draft made up

124 of 243
seats where the net fall exceeds the margin

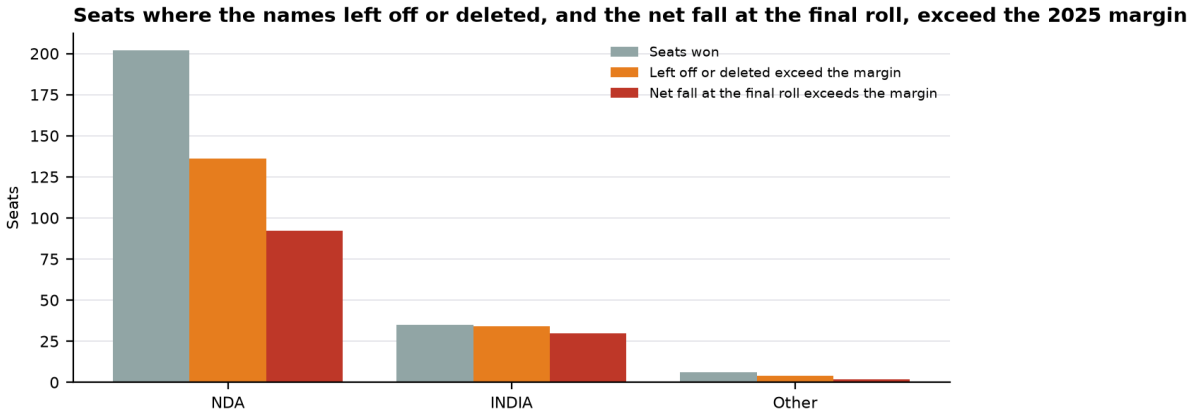

Figure 4. By the alliance that won the seat in 2025.

After the draft, 21,53,343 names were added on claims and 3,66,742 deleted on objections, so the final roll rose by 17,86,601 over the draft. That rise equals 27.2% of the 65,59,409 names left off the draft. That rise counts new electors as well as names put back, and the Commission has not said how many of those added had been left off the draft, so it is the most that can have been put back. The final roll was 47,77,487 names smaller than the roll before the revision. This report calls that difference the net fall, and the roll fell in every one of the 243 seats.

In 124 of 243 seats the fall that remained at the final roll was still larger than the 2025 winning margin, against 174 when every name left off or deleted is counted. Of those 124, the NDA won 92, INDIA 30 and others 2.

Women were 55.5% of the names left off the draft and 47.9% of those added after it, so their share of the roll fell from 47.9% before the revision to 47.2% on the final roll. Of the 3,66,742 names deleted after the draft, 62,441 were entered as dead, 2,12,999 as shifted and 81,334 as repeated, and 9,968 have no reason at all.

Women among the names left off or deleted

The roll records each elector's sex, so women's share of the names left off or deleted needs no estimate. Women are 55.5% of all the names left off or deleted. That is 38,33,870 women against 30,76,689 men, 7,57,181 more women than men. Their share of those names exceeds their share of the roll before the revision in 38 of 38 districts, by up to 13.7 points in Kaimur. The roll before the revision is the draft roll by sex plus the names left off the draft by sex.

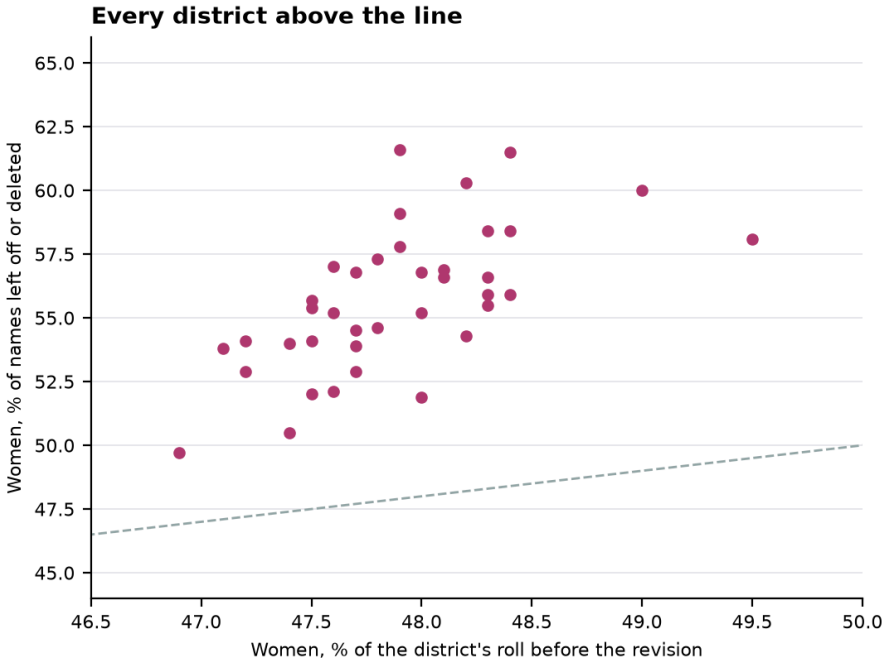

Figure 5. Each dot is a district. Above the dashed line, women's share of the names left off or deleted exceeds their share of the roll.

Phase 1 left off 7,20,543 more women than men, and 5,64,439 of that difference (78.3%) were entered as shifted. Among those marked shifted aged 18 to 29, 72.6% are women, the pattern that women who move on marriage would produce. The lists do not show whether any of them were enrolled again where they now live. If they were not, they have lost the vote.

Reasons entered for names left off the draft

The phase 1 lists record, against every one of the 65,59,626 names, the reason the officer entered for leaving it off the draft. Counted as they were entered, 26,55,900 were marked permanently shifted (40.5%), 22,32,586 dead (34.0%), 9,70,081 absent (14.8%) and 7,01,059 already enrolled elsewhere (10.7%). The counts agree with the booth list in every booth, and the counts of women and men agree with the Chief Electoral Officer's phase 1 figures in every constituency. The 3,51,150 names deleted after the draft in phase 2 carry no reason in the lists.

A reason is what the officer wrote down after a visit, or after failing to find the elector, and nobody checked it. Someone marked shifted may have been away for work when the officer called, and someone marked absent may have been at home. Of the four, absent rests on the least, because it records only that the officer did not find the elector. A name marked already enrolled is fairly left off only if the other entry is the same person.

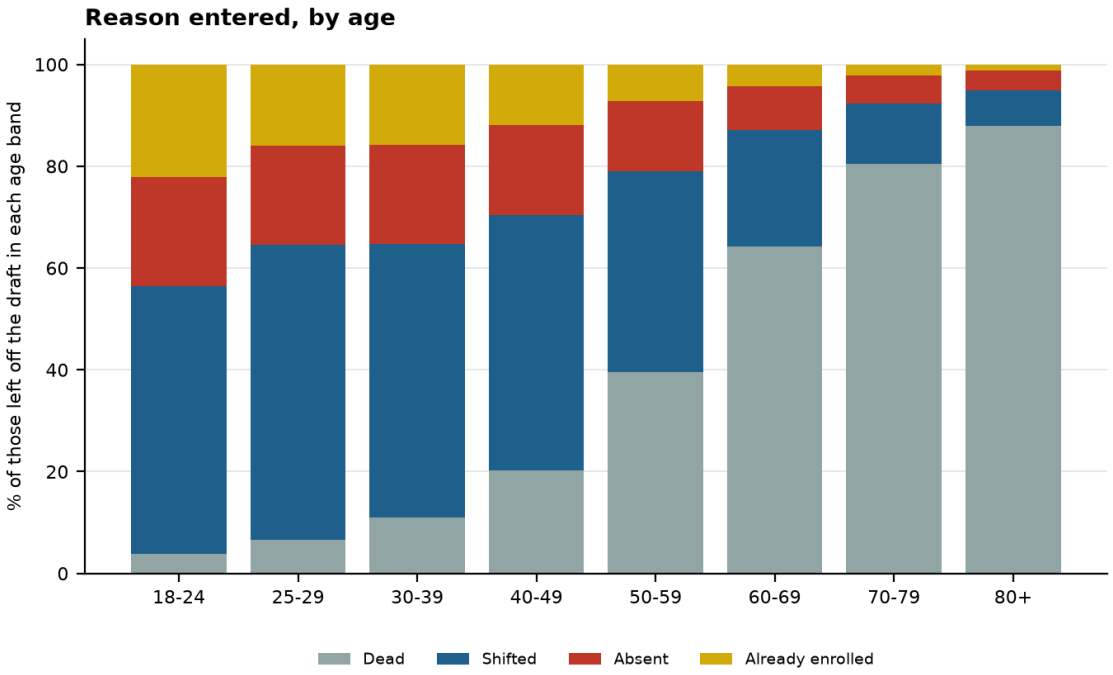

Figure 6. The reason entered against each name left off the draft in phase 1, by the elector's age.

Among those left off the draft aged 80 and over, 88.0% were entered as dead, and among those aged 18 to 24, 3.8%. The young were mostly marked shifted or absent.

Taken alone, the names marked absent exceed the 2025 margin in 20 of 243 seats, and the names marked already enrolled in 18. The names marked shifted exceed it in 76 and the dead in 58. The absent share is highest in Madhubani (28.2%), Sheohar (28.1%) and Gopalganj (25.7%).

District	Left off the draft	Shifted	Dead	Absent	Already enrolled
Madhubani	3,52,229	33.5%	28.7%	28.2%	9.7%
Sheohar	28,136	37.5%	26.0%	28.1%	8.4%
Gopalganj	3,10,028	42.2%	22.9%	25.7%	9.2%
Kishanganj	1,45,639	40.8%	27.1%	23.5%	8.6%
Purnia	2,73,793	39.8%	31.3%	21.8%	7.1%
Sitamarhi	2,44,788	33.7%	37.0%	18.6%	10.6%
Patna	3,95,080	39.2%	34.0%	18.6%	8.2%
East Champaran	3,16,230	37.3%	33.9%	16.8%	12.0%
Saharsa	1,31,482	45.5%	26.8%	16.5%	11.2%
Katihar	1,85,261	43.2%	31.8%	15.9%	9.1%
Samastipur	2,83,585	44.7%	27.6%	15.5%	12.2%
Saran	2,73,046	41.1%	33.8%	15.3%	9.9%
Jehanabad	52,918	43.1%	33.1%	14.8%	9.0%

Arwal	30,107	39.4%	42.0%	2.9%	15.7%

Two reasons, set against the records

The 22.3 lakh names entered as dead equal about 3.4 years of adult deaths in Bihar. At the Sample Registration System's 2024 death rates by age and sex, the population aged 20 and over has about 6.5 lakh deaths a year. The ages of those entered as dead are close to those of registered deaths. 41.8% of those aged 25 or over were 70 or older, and 39.4% of registered deaths at those ages in 2024. Their sex does not match. Women are 52.0% of those entered as dead but 43.4% of adult deaths, which means 11.6 lakh women where 9.7 lakh would be expected. Women were only 37.7% of registered deaths at 25 and over in 2024, so women's deaths are registered less often and more of them may have stayed on the roll. The other possibility is that more women who are alive were entered as dead. The lists cannot tell the two apart.

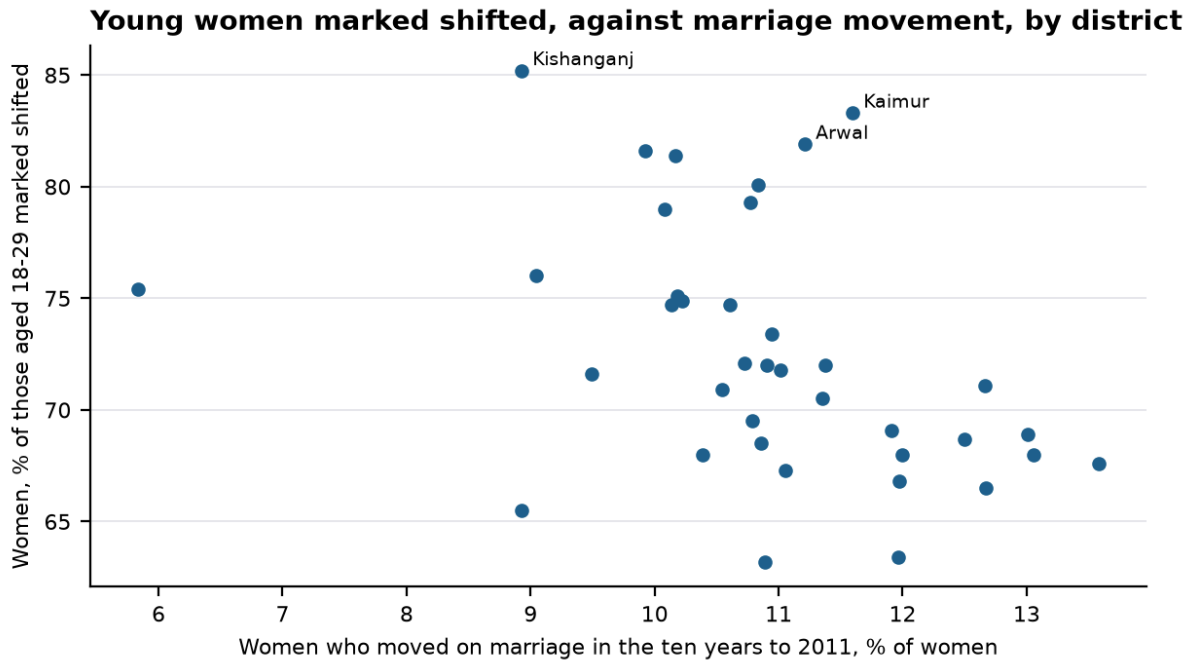

Figure 7. Each dot is a district. Marriage movement from the 2011 census migration table D-3, counted where women arrived.

Among those aged 18 to 29 marked shifted, 4,58,953 were women and 1,72,765 men, so women outnumber men by 2,86,188. Marriage alone could account for a number that size. In the ten years before the 2011 census, 53.8 lakh women in Bihar moved on marriage, about 5.4 lakh a year, so the excess is about 0.53 of one year's marriage moves. The districts do not fit. Where more women had moved on marriage, women were a smaller share of the young marked shifted (rank correlation -0.51). A rank correlation runs from -1 to 1 and shows whether districts that rank high on one measure also rank high on the other. Marriage can explain how many young women were marked shifted, but it cannot explain where they were. The census counts women in the district they moved to, and its figures are fifteen years old.

Religion

The roll records no religion, so religion here is guessed from names. The booth lists classify the names left off the draft as Hindu or Muslim where the name allows it, and leave 9.0% of names unclassified. The Muslim share of the names left off the draft is therefore given as a range. It is 15.4% counting only names classified Muslim, and 24.4% if every unclassified name were Muslim. Bihar's Muslim population was 16.87% in the 2011 census and 17.70% in the 2023 caste survey. The census share lies inside the range in 18 of 38 districts. In 8 districts (Aurangabad, Gaya, Jehanabad, Lakhisarai, Nalanda, Nawada, Patna and Sheikhpura) the classified Muslim share alone runs more than a point above the census share.

The 2011 census is the last count of religion by district, so each district's share is also carried forward to 2025 at the growth rates of its Muslim and total populations between the 2001 and 2011 censuses. That puts Bihar's Muslim share at 17.3% in 2025, close to the caste survey's 17.7%, and moves no district by more than 2.8 points. On the 2025 shares the range holds the population share in 20 districts, and the classified Muslim share is still more than a point above it in 8 districts (Aurangabad, Gaya, Jehanabad, Lakhisarai, Nalanda, Nawada, Patna and Sheikhpura).

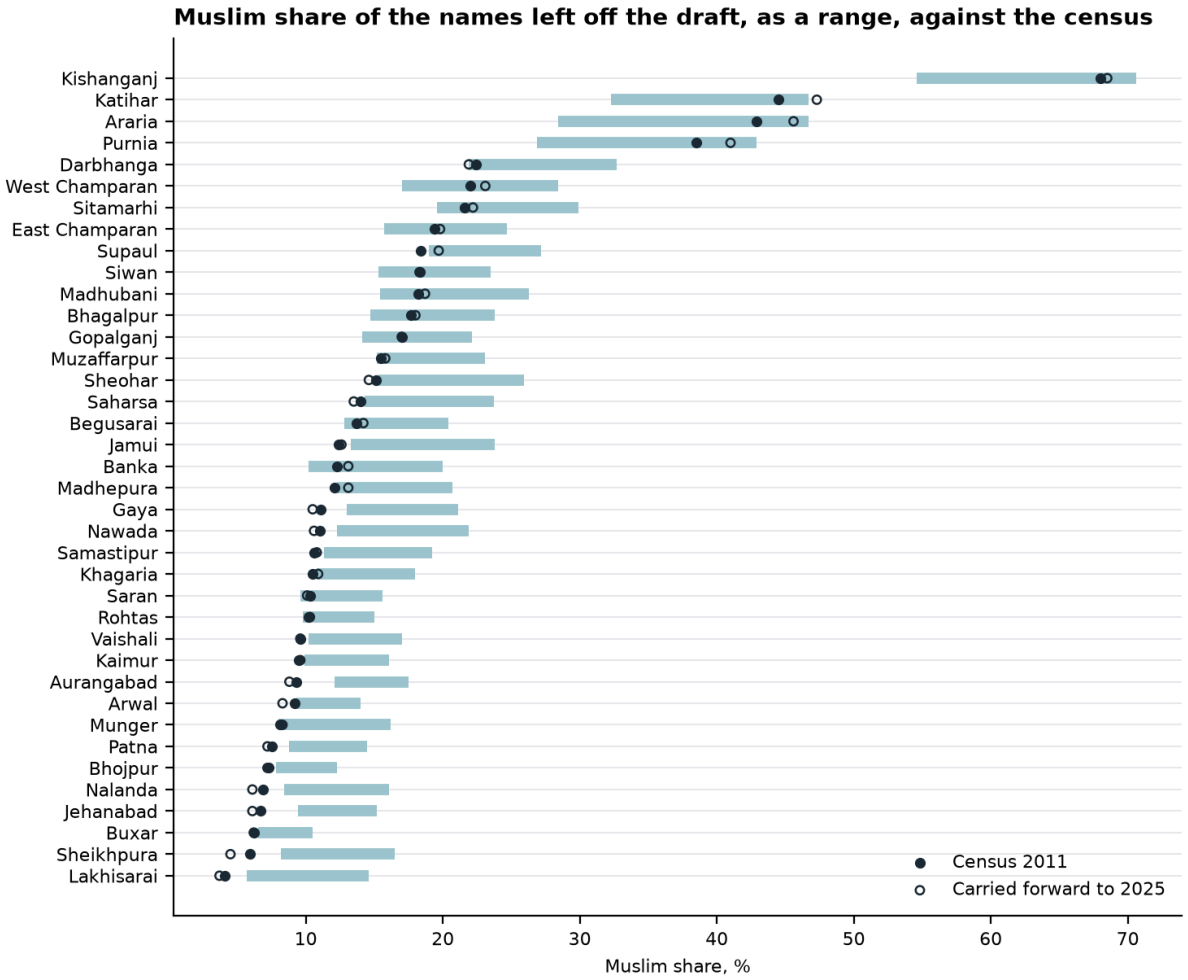

Figure 8. The bar runs from names classified Muslim to all names that could be Muslim, the filled dot is the 2011 census share, and the open dot that share carried forward to 2025.

Caste

Caste is not recorded either. It can be read, in part, from the surname of the father or husband listed with each elector left off the draft, and two classifications are used because surnames cross caste lines. Classification A places 70.9% of the names left off the draft in a group. The stricter classification B sets aside surnames carried by more than one group and places 35.1%. Only what holds under both is reported here.

Group	Survey share 2023	Share under A	Ratio A	Share under B	Ratio B
General	10.72%	34.4%	3.21	14.7%	1.37
BC	25.03%	14.8%	0.59	17.0%	0.68
EBC	25.72%	17.4%	0.68	7.8%	0.30
SC	19.65%	20.0%	1.02	30.0%	1.53
ST	1.68%	1.1%	0.68	1.5%	0.92
Muslim	17.70%	12.2%	0.69	29.0%	1.64

A ratio above 1 means the group's share of the names left off the draft exceeds its share of the population. Under both classifications, General and SC families are left off the draft at or above their population share and BC, EBC and ST families below it. The two disagree on Muslim families.

Booths

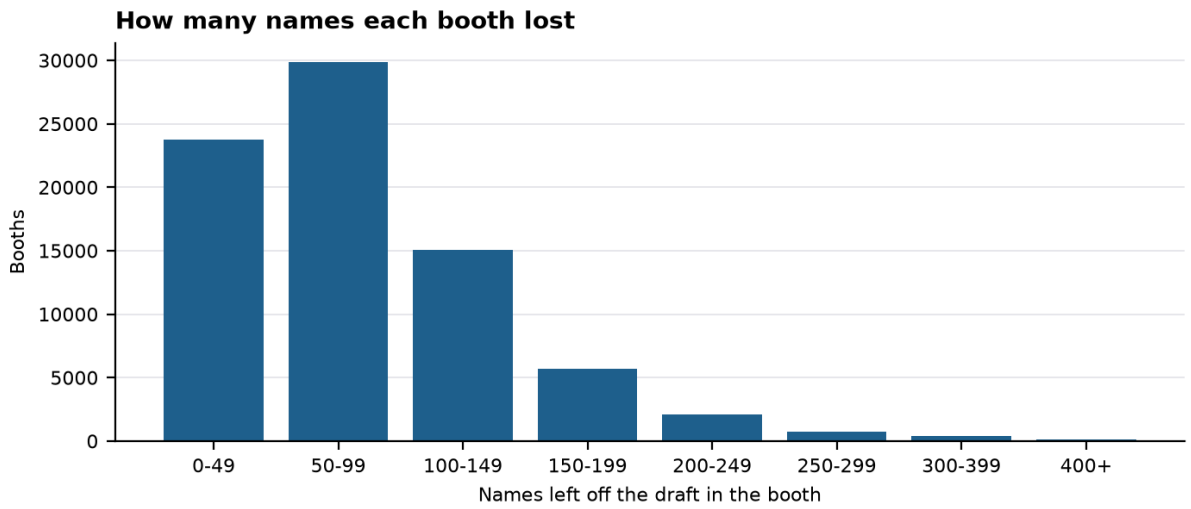

Figure 9. Booths by the number of names left off the draft.

The typical booth lost 72 names. 3,418 booths lost 200 or more each, and 142 lost 400 or more. A booth serves on average about 960 electors, so 200 names is a fifth of a booth's roll.

Border districts

District neighbours	Seats	Names left off or deleted	Per 100 electors	Women %
West Bengal	7	2,99,452	14.30	55.5%
Nepal + West Bengal	4	1,56,727	13.92	61.5%
Uttar Pradesh	35	11,22,554	10.58	58.3%
Nepal	41	12,50,302	9.95	54.8%
Jharkhand + West Bengal	7	2,06,621	9.93	56.6%
Jharkhand	36	9,97,932	8.90	55.5%
Interior	93	24,22,953	8.37	53.8%
Nepal + Uttar Pradesh	9	2,17,300	8.26	54.1%
Jharkhand + Uttar Pradesh	11	2,36,718	6.94	58.8%

A constituency counts as a border seat when its district touches Nepal, West Bengal, Jharkhand or Uttar Pradesh. Border seats lost 9.81 names per 100 electors, the interior 8.37.

The alliances

Seats the NDA won in 2020 lost 9.59 names per 100 electors, and seats INDIA won lost 8.79. The order stays the same when seats are labelled by the 2024 or 2025 result. Inside the same constituency, booths the NDA led in 2024 lost 2.4 more names each than booths INDIA led. A booth's leading party shows how most of its voters voted in 2024 and says nothing about the electors left off or deleted, since every booth has voters on both sides. The seats INDIA lost in 2025 did not lose names faster than the seats it kept. The lists do establish how many names were left off or deleted against the margins, set out above.

Main findings

- 69,10,559 names were left off the draft or deleted after it, 9.25 per 100 electors on the 2025 roll, across 77,837 booths.
- The names left off or deleted equal 13.9% of the votes polled in the November 2025 election, one for every 7.2 votes cast.
- The names left off or deleted were larger than the winning margin in 174 of 243 seats, five times the margin or more in 30, and ten times or more in 18.
- They were larger than the NDA's combined winning margin in its 202 wins (69.1 lakh against 46.7 lakh).
- In 66 of the 87 seats the NDA took from INDIA, more names were left off or deleted than the NDA won by.
- Women are 55.5% of the names left off or deleted, and over-represented in 38 of 38 districts.
- Muslim names, guessed from names, are 15.4% to 24.4% of the names left off the draft, against 16.87% of the population in 2011, and more than a point above the census share in 8 districts.
- In 56 seats those left off or deleted who would have voted were enough to change the result, and in 7 a lean of just over half among them would have done it.
- Women are 52.0% of the names entered as dead, against 43.4% of adult deaths in Bihar.
- 3,418 booths lost 200 names or more each.
- In phase 1, 40.5% of the names left off the draft were entered as shifted, 34.0% as dead, 14.8% as absent and 10.7% as already enrolled. 5,64,439 of the 7,20,543 more women than men left off the draft were marked shifted.
- The names marked absent, taken alone, exceed the margin in 20 seats, and the names marked already enrolled in 18.
- The final roll made up 27.2% of the names left off the draft, and the fall that remained still exceeded the margin in 124 of 243 seats. Women were 47.9% of those added after the draft.

How sure are the findings?

A pattern seen across all seats can weaken or turn round once seats are compared only with seats like them. Each finding was measured again within each district, within each seat, and with Seemanchal left out.

Finding	How it was checked	Result
More names left off or deleted than the winning margin	Names left off or deleted: 174 of 243 seats. Net fall to the final roll: 124 of 243.	Holds on both counts
Women left off or deleted out of proportion to the roll	Districts: 38 of 38. Constituencies: 242 of 243.	Holds in every district
More names left off or deleted on NDA ground	All seats: 9.59 per 100 electors where the NDA won in 2020, 8.79 where INDIA won. Seats in the same district: +0.46 (-0.17 to 1.10) per 100. Booths in the same seat: NDA-led booths lost 2.4 more names each, and more in 150 of 237 seats.	Holds inside seats. Between seats in the same district the gap is too small to be sure of
Seats that lost more names swung further to the NDA	All seats: -0.61 (-1.26 to 0.05). Within districts: -0.83 (-1.86 to 0.20). Within districts, allowing for the 2020 result: +0.31 (-0.27 to 0.89). Seats the NDA held: +0.29 (-0.36 to 0.95). Seats INDIA held: -0.08 (-1.48 to 1.31). Leaving out Seemanchal: +0.46 (-0.23 to 1.15). Positive in 20 of 32 districts.	Cannot tell. The answer changes with the comparison

Two findings survive every check. In most constituencies more names were left off or deleted than the margin that decided the seat, and the net fall to the final roll was larger than it too. Women were left off or deleted out of proportion in all 38 districts and 242 of 243 constituencies.

What this shows and what it does not

The lists show how many names were left off the draft or deleted after it, where, who those people were by sex, age and name, and the reason the officer entered against each name left off the draft in phase 1, and they allow those names to be set against the margins and votes that decided each seat. They do not show whether that reason was true of the person, whether the name was rightly left off or deleted, or how the elector voted. Religion and caste are guessed from names, so they are given as ranges or under two classifications. Votes polled are the turnout on the 2025 roll, within about 1% of a second calculation from each winner's vote and share.

Part II: District chapters

One chapter for each of Bihar's 38 districts, in order of names left off or deleted per 100 electors. Each gives the district's totals and every constituency in it, with the 2025 result.

Gopalganj

3,14,853
names left off or deleted

17.31
per 100 electors (#1 of 38)

26.2%
of votes polled in 2025

6 of 6
seats where names left off or deleted exceed the margin

Gopalganj lost 3,14,853 names across 6 constituencies, 17.31 for every 100 electors. Women are 60.0% of the names left off or deleted, against 49.0% of the district's roll. Names classified Muslim are 14.1% to 22.1% of the names left off the draft, against a 2011 census share of 17.0%. The constituency with the most names left off or deleted for its size is Gopalganj, at 22.72 per 100 electors, and the largest multiple of the margin is in Barauli, where 48,477 names were left off or deleted against a margin of 12,374. In 2025 the NDA won 6 of the district's seats and INDIA 0.

Of its 3,10,028 names left off the draft in phase 1, the officers entered 42.2% as shifted, 22.9% as dead, 25.7% as absent and 9.2% as already enrolled.

Constituency	Left off or deleted	Per 100	Women %	Won by (2025)	Margin	× margin	% polled
99 Baikunthpur	46,412	15.05	59.8%	BJP (NDA)	16,953	2.7×	21.9%
100 Barauli	48,477	17.06	60.0%	JD(U) (NDA)	12,374	3.9×	25.3%
101 Gopalganj	67,501	22.72	59.4%	BJP (NDA)	28,972	2.3×	34.1%
102 Kuchaikote	60,230	20.07	59.9%	JD(U) (NDA)	24,491	2.5×	30.4%
103 Bhore	45,792	13.57	60.2%	JD(U) (NDA)	16,163	2.8×	22.2%
104 Hathua	46,441	15.95	60.9%	JD(U) (NDA)	12,348	3.8×	23.9%

Purnia

2,99,452
names left off or deleted

14.30
per 100 electors (#2 of 38)

18.8%
of votes polled in 2025

3 of 7
seats where names left off or deleted exceed the margin

Purnia lost 2,99,452 names across 7 constituencies, 14.30 for every 100 electors. Women are 55.5% of the names left off or deleted, against 48.3% of the district's roll. Names classified Muslim are 26.9% to 42.9% of the names left off the draft, against a 2011 census share of 38.5%. The constituency with the most names left off or deleted for its size is Purnia, at 23.64 per 100 electors, and the largest multiple of the margin is in Kasba, where 36,240 names were left off or deleted against a margin of 12,875. In 2025 the NDA won 5 of the district's seats and INDIA 0, and 2 went to neither alliance.

Of its 2,73,793 names left off the draft in phase 1, the officers entered 39.8% as shifted, 31.3% as dead, 21.8% as absent and 7.1% as already enrolled.

Constituency	Left off or deleted	Per 100	Women %	Won by (2025)	Margin	× margin	% polled
56 Amour	47,373	15.14	61.1%	AIMIM (Other)	38,928	1.2×	20.5%
57 Baisi	27,113	9.45	60.2%	AIMIM (Other)	27,251	0.99×	12.2%
58 Kasba	36,240	12.59	55.4%	LJP(RV) (NDA)	12,875	2.8×	15.5%
59 Banmankhi	37,097	12.28	55.6%	BJP (NDA)	45,296	0.8×	17.5%
60 Rupauli	39,248	13.14	55.7%	JD(U) (NDA)	73,572	0.5×	17.8%
61 Dhamdaha	43,626	13.85	54.0%	JD(U) (NDA)	55,159	0.8×	18.4%
62 Purnia	68,755	23.64	50.6%	BJP (NDA)	33,222	2.1×	29.4%

Kishanganj

1,56,727
names left off or deleted

13.92
per 100 electors (#3 of 38)

17.8%
of votes polled in 2025

4 of 4
seats where names left off or deleted exceed the margin

Kishanganj lost 1,56,727 names across 4 constituencies, 13.92 for every 100 electors. Women are 61.5% of the names left off or deleted, against 48.4% of the district's roll. Names classified Muslim are 54.6% to 70.6% of the names left off the draft, against a 2011 census share of 68.0%. The constituency with the most names left off or deleted for its size is Kishanganj, at 18.57 per 100 electors, and the largest multiple of the margin is in Kishanganj, where 52,574 names were left off or deleted against a margin of 12,794. In 2025 the NDA won 1 of the district's seats and INDIA 1, and 2 went to neither alliance.

Of its 1,45,639 names left off the draft in phase 1, the officers entered 40.8% as shifted, 27.1% as dead, 23.5% as absent and 8.6% as already enrolled.

Constituency	Left off or deleted	Per 100	Women %	Won by (2025)	Margin	× margin	% polled
52 Bahadurganj	39,475	13.56	61.2%	AIMIM (Other)	28,726	1.4×	18.3%
53 Thakurganj	31,708	10.53	63.2%	JD(U) (NDA)	8,822	3.6×	12.9%
54 Kishanganj	52,574	18.57	60.4%	INC (INDIA)	12,794	4.1×	23.1%
55 Kochadhaman	32,970	13.15	62.1%	AIMIM (Other)	23,021	1.4×	17.1%

Madhubani

3,61,114
names left off or deleted

11.55
per 100 electors (#4 of 38)

18.2%
of votes polled in 2025

9 of 10
seats where names left off or deleted exceed the margin

Madhubani lost 3,61,114 names across 10 constituencies, 11.55 for every 100 electors. Women are 54.6% of the names left off or deleted, against 47.8% of the district's roll. Names classified Muslim are 15.4% to 26.3% of the names left off the draft, against a 2011 census share of 18.2%. The constituency with the most names left off or deleted for its size is Rajnagar, at 15.04 per 100 electors, and the largest multiple of the margin is in Bisfi, where 30,343 names were left off or deleted against a margin of 8,107. In 2025 the NDA won 9 of the district's seats and INDIA 1.

Of its 3,52,229 names left off the draft in phase 1, the officers entered 33.5% as shifted, 28.7% as dead, 28.2% as absent and 9.7% as already enrolled.

Constituency	Left off or deleted	Per 100	Women %	Won by (2025)	Margin	× margin	% polled
31 Harlakhi	37,156	13.45	53.9%	JD(U) (NDA)	36,236	1.0×	20.9%
32 Benipatti	32,853	11.32	54.2%	BJP (NDA)	23,932	1.4×	18.8%
33 Khajauli	36,590	12.46	56.1%	BJP (NDA)	13,126	2.8×	18.1%
34 Babubarhi	35,139	11.41	54.3%	JD(U) (NDA)	17,568	2.0×	17.4%

38 Jhanjharpur	26,588	8.31	55.1%	BJP (NDA)	54,849	0.5×	13.9%
39 Phulparas	39,139	12.21	55.2%	JD(U) (NDA)	14,099	2.8×	19.4%
40 Laukaha	37,879	11.24	55.5%	JD(U) (NDA)	25,511	1.5×	16.8%

Bhagalpur

2,53,818
names left off or deleted

11.35
per 100 electors (#5 of 38)

16.9%
of votes polled in 2025

3 of 7
seats where names left off or deleted exceed the margin

Bhagalpur lost 2,53,818 names across 7 constituencies, 11.35 for every 100 electors. Women are 58.1% of the names left off or deleted, against 49.5% of the district's roll. Names classified Muslim are 14.7% to 23.8% of the names left off the draft, against a 2011 census share of 17.7%. The constituency with the most names left off or deleted for its size is Sultanganj, at 14.32 per 100 electors, and the largest multiple of the margin is in Bhagalpur, where 33,936 names were left off or deleted against a margin of 13,474. In 2025 the NDA won 7 of the district's seats and INDIA 0.

Of its 2,44,409 names left off the draft in phase 1, the officers entered 51.4% as shifted, 25.7% as dead, 12.1% as absent and 10.9% as already enrolled.

Constituency	Left off or deleted	Per 100	Women %	Won by (2025)	Margin	× margin	% polled
152 Bihpur	25,870	9.71	59.6%	BJP (NDA)	30,025	0.9×	14.9%

157 Sultanganj	45,838	14.32	59.2%	JD(U) (NDA)	31,136	1.5×	22.0%
158 Nathnagar	38,805	11.48	58.0%	LJP(RV) (NDA)	25,424	1.5×	16.3%

Saharsa

1,39,670
names left off or deleted

10.76
per 100 electors (#6 of 38)

15.8%
of votes polled in 2025

4 of 4
seats where names left off or deleted exceed the margin

Saharsa lost 1,39,670 names across 4 constituencies, 10.76 for every 100 electors. Women are 55.9% of the names left off or deleted, against 48.4% of the district's roll. Names classified Muslim are 14.3% to 23.7% of the names left off the draft, against a 2011 census share of 14.0%. The constituency with the most names left off or deleted for its size is Mahishi, at 13.59 per 100 electors, and the largest multiple of the margin is in Saharsa, where 28,198 names were left off or deleted against a margin of 2,038. Conclusion and what the Election Commission should do

The revision left off or deleted 69,10,559 names from Bihar's roll in the months before an Assembly election. The names left off or deleted exceed the margin in 174 of 243 seats and equal 13.9% of all votes polled. Whatever reason was written against each name, in most of the state the roll changed by more than the vote that decided the seat.

Women carried a larger share of the names left off or deleted than their share of the roll in every district, and the lists cannot show whether those women were enrolled again where they now live. Of the four reasons entered, absent rests on the least. 9,70,081 names were left off as absent, and those alone exceed the margin in 20 seats.

What the Election Commission should do:

1. Publish the reason for each of the 3,51,150 names deleted after the draft in phase 2, name by name. The lists give none, and the Format 4B return gives reasons only by constituency, with 9,968 names left without any.
2. Publish the basis for each entry marked absent or already enrolled, the 9,70,081 marked absent and the 7,01,059 marked already enrolled in phase 1.
3. Publish every claim and objection filed after the draft roll, booth by booth, with its outcome, and say how many of the 21.5 lakh added had been left off the draft, so that restorations can be counted against the names left off.
4. Publish new enrolments by constituency after the revision, so that women left off as shifted can be matched against enrolments where they now live.

Method and sources

- The names left off the draft, by polling booth, come from the phase 1 lists that the Chief Electoral Officer, Bihar published with the draft roll of 1 August 2025, for all 77,837 booths.
- The names left off the draft or deleted after it, by constituency, phase and sex, come from the Chief Electoral Officer, Bihar.
- The final roll is from Format 4B, the Election Commission's return for the final roll of 30 September 2025, as published by the Chief Electoral Officer, Bihar, by constituency and sex. The same return gives the draft roll by sex, which with the names left off the draft gives women's share of the roll before the revision.
- Religion and surnames of those left off the draft are counted by booth from the same lists, with no individual records kept.
- The reason, sex and age of every name left off the draft are counted by constituency and booth from the same lists, with no individual records kept.
- Deaths come from the Sample Registration System Statistical Report 2024 and the Civil Registration System 2024, and marriage migration from Census of India 2011, table D-3.
- The 2025 Assembly results give the winner, runner-up and turnout for each constituency.
- The 2024 Lok Sabha result by booth is from Form 20. The other sources are the Census of India 2001 and 2011 for religion by district, the National Family Health Survey 2019-20 for women's literacy, schooling and marriage before 18 by district, the Bihar caste-based survey of 2 October 2023, and the Bihar Economic Survey.

Votes polled are the turnout applied to the 2025 roll. No name, EPIC number or address is published.
