DELHI 2026

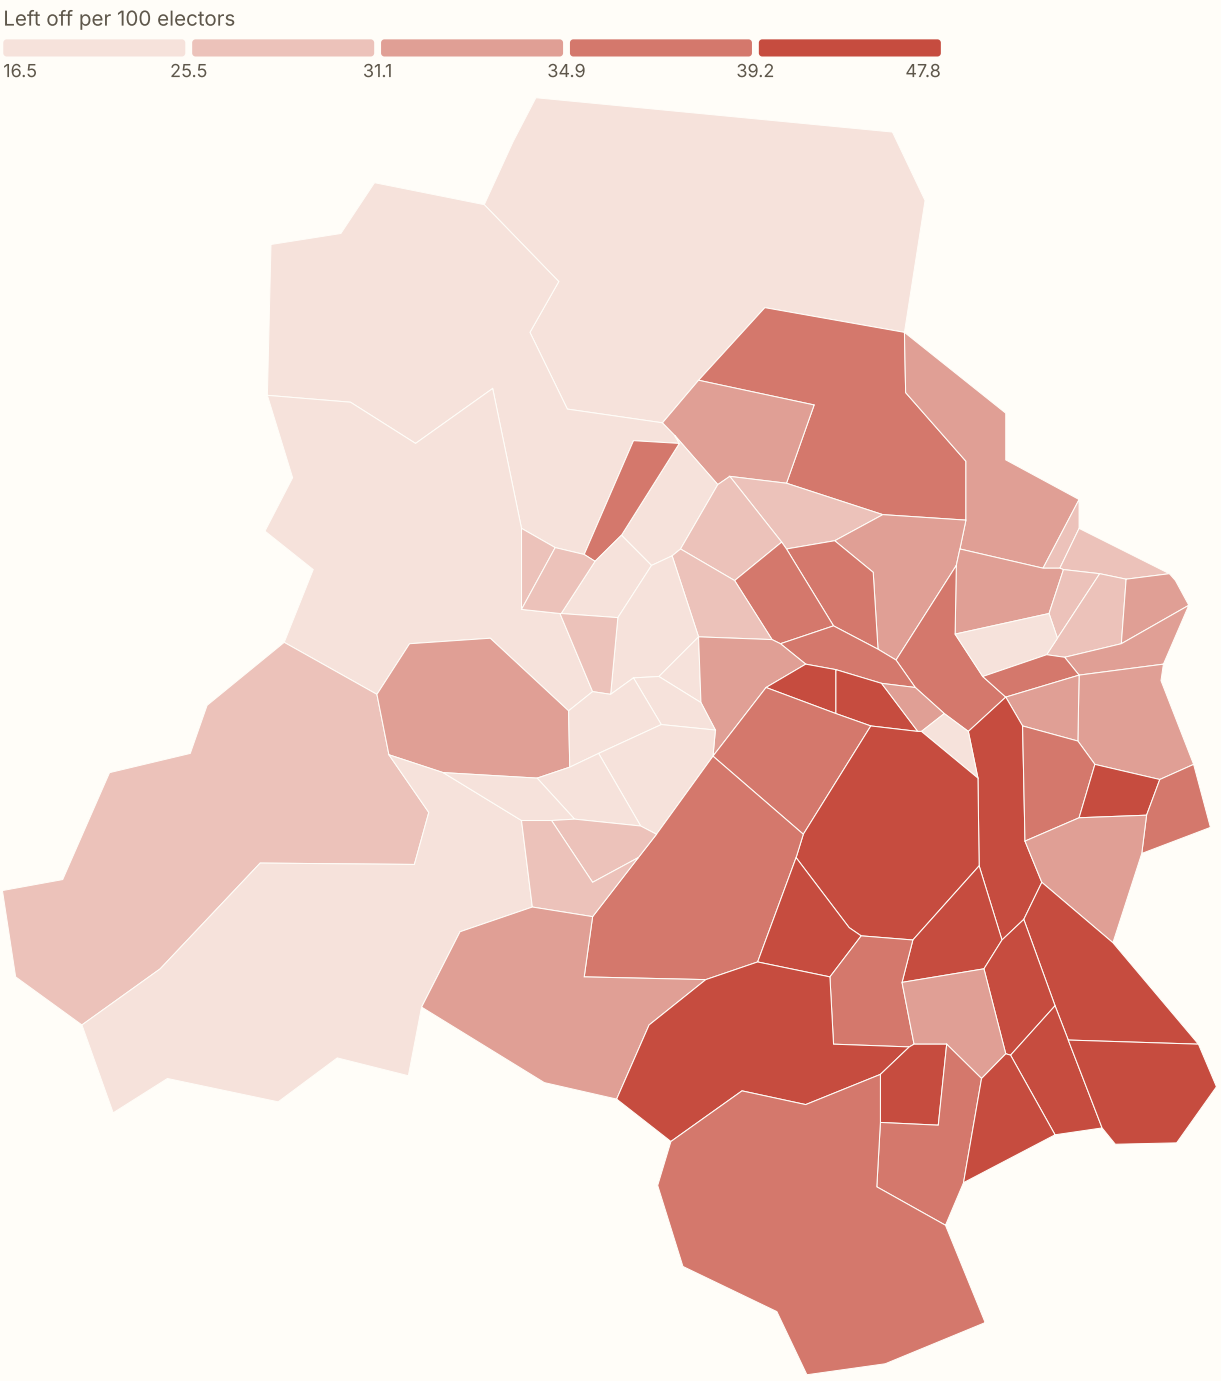

Figures as of 31 August 2026, when the draft roll was published. The final roll is due on 4 December 2026.

Overview

1. Delhi's draft roll left off 47.6 lakh names, 32.8 of every 100 electors on the roll before the revision.
2. In 68 of the 70 constituencies, more names were left off than the 2025 winning margin.
3. South East district left off the most, 43.6 per 100, and Tughlakabad the most of any constituency, 47.8.
4. 91.1% were entered as shifted, absent or other, and 5.9% as dead.
5. Men were left off more often than women, 35.3 per 100 men against 29.9 per 100 women, with the roll before the revision by sex as reported in the press.

Find a constituency or district

An assembly constituency is the area that elects one member of the Delhi assembly, and Delhi has 70. Type a constituency's name or number, or a district, and its figures appear below with a link you can send.

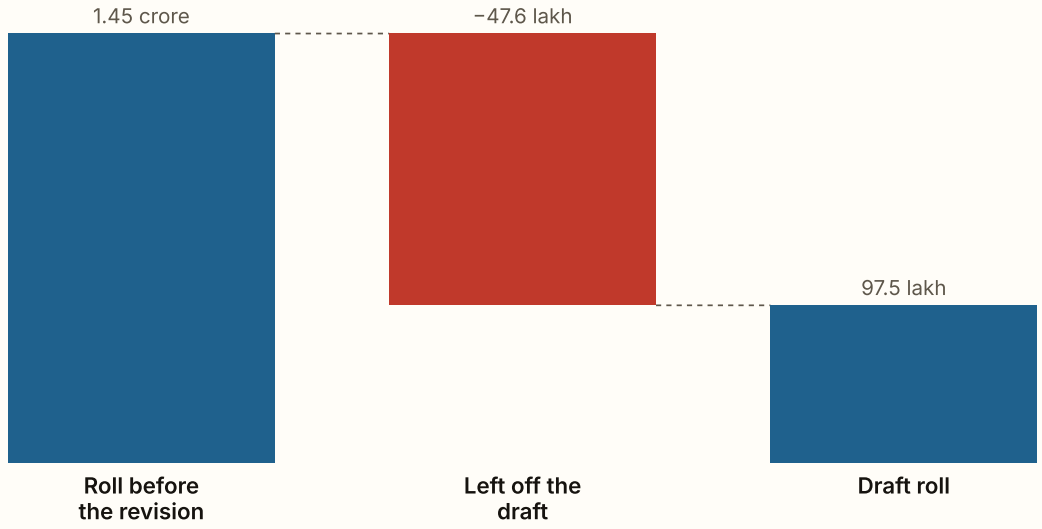

Each constituency is shaded by the names left off its draft roll for every 100 electors on its roll before the revision. Tap a constituency for its figures. Boundaries drawn from DataMeet's assembly constituency map (CC BY 2.5 India), simplified.

The roll, step by step

The roll before the revision is the list of electors when the revision began, here the roll of 16 June 2026. The draft roll of 31 August 2026 is the list published once the enumeration forms were collected, and a name whose form did not come back was left

off it. Electors can now ask to be added, or object to names, until 30 October 2026, and only then comes the final roll. The bars start above zero so that the changes can be seen.

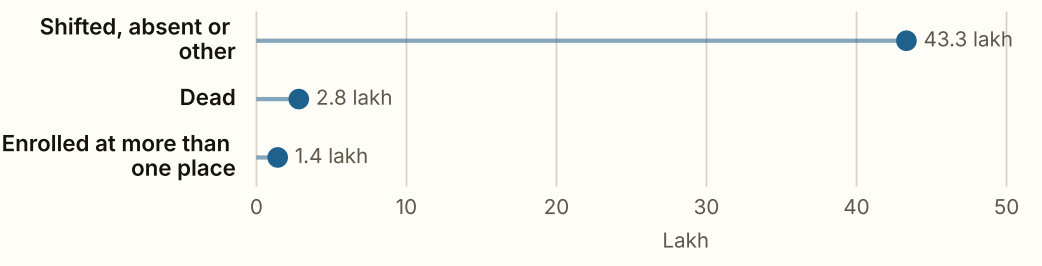

> **The draft roll left off 47.6 lakh names, 32.8 of every 100 electors.** In 13 of the 70 constituencies it left off 40 or more of every 100. It ranges from 16.5 per 100 in Rohini to 47.8 in Tughlakabad.

Delhi's dates, as they were set and as they were moved, are drawn beside every other state's on How the revision was run.

The reasons

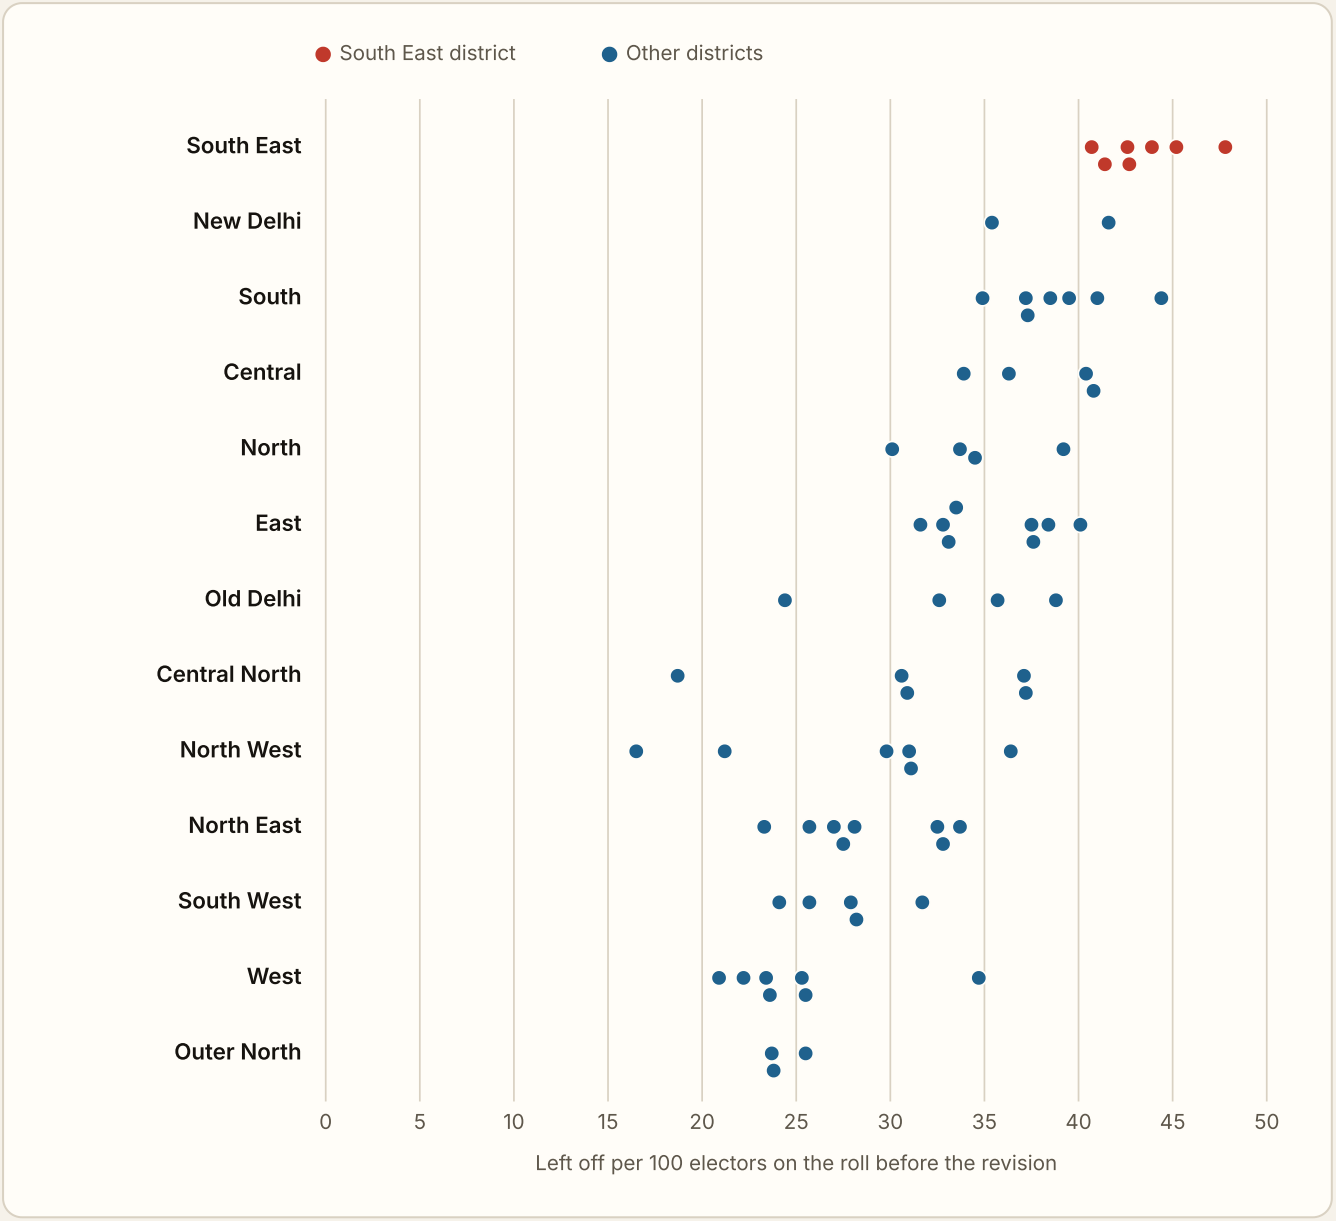

Each name left off the draft carries one of three reasons. The reasons were published for Delhi as a whole, and the chart counts them in lakh (one lakh is 100,000). A reason is what the officer wrote down, and nobody checked it.

91.1% were entered as shifted, absent or other, 5.9% as dead and 3.0% as enrolled at more than one place. The Chief Electoral Officer did not separate shifted from absent.

Per 100 electors, by district

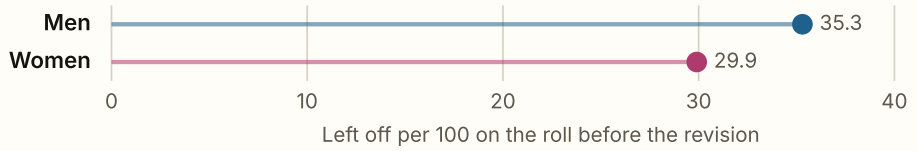

Each dot is one constituency's names left off, for every 100 electors on its roll before the revision. Counting per 100 electors puts large and small constituencies on one scale, so a rate of 40 means two electors in five were left off. The constituencies are grouped by Delhi's 13 districts, as the Chief Electoral Officer's table groups them. The figures are from the table of the Chief Electoral Officer (CEO), who keeps Delhi's rolls for the Election Commission. Hover or tap a dot for its name.

South East district left off 43.6 of every 100 electors, the most of the 13. New Delhi and South come next, at 39.0 and 38.6. Outer North left off the fewest, 24.3.

Women

Names left off for every 100 men and every 100 women on the roll before the revision. The split by sex was published for Delhi as a whole only.

Men were left off more often than women, 35.3 of every 100 men against 29.9 of every 100 women. Women were 46.9% of the roll before the revision and 42.8% of the names left off, so their share of the draft roll rose to 48.8%. These are state figures, with the roll before the revision by sex as reported in the press. The split by constituency was not published.

Against the 2025 margins

The winning margin is the winner's votes less the runner-up's. Each dot is a constituency. Its place across is the margin its 2025 winner won by, and its height is the names left off its draft roll. Above the dashed line, more names were left off than the margin. The election came before the revision, so this measures how large the removals are against the votes that decide a seat. Nobody can know how anyone left off would have voted.

In 68 of the 70 constituencies, more names were left off the draft than the 2025 winning margin. Not everyone on a roll votes, so scaled down by each seat's 2025 turnout it is 66. The exceptions are Matia Mahal and Rohini. The BJP's 48 seats lost 31.3 per 100 and the AAP's 22 lost 36.0. Against their own districts the two are -0.6 and 0.1 points. So the difference comes mostly from where each party's seats are. Larger than the margin means large enough to decide a seat, and it says nothing about whether it would have.

After the draft

Of the electors left on the draft roll, 33.1 lakh were sent a notice to prove their entry, 34.0 of every 100. According to the press, 13.8 lakh of them were on the no-mapping list, of electors who could not be linked to the roll of the last intensive revision, and 19.3 lakh were on the logical discrepancy list, of entries whose details were flagged as not agreeing. An elector asks to be added with Form 6, and an objection to a name already on the roll is made with Form 7. By 29 September, according to the press, 3.7 lakh Form 6 claims and 55,095 Form 7 objections had been filed, counting those filed before the draft. Claims and objections close on 30 October 2026, and the final roll is due after that.

Every figure on this page is computed from the published data when the page loads. Sources and method.

This site publishes counts only, never a name. For analysis that looks at named voters in Delhi, see the Sabar Institute's report on the Delhi revision.

The reasons and the split by sex are for Delhi as a whole, and there is no final roll yet.

Questions about this page

How many names did the revision remove in Delhi?

Delhi's draft roll left off 47.6 lakh names, 32.8 of every 100 electors on the roll before the revision. The draft roll is the list published once the enumeration forms were collected, and a name whose form was not collected was left off it. 91.1% were entered as shifted, absent or other, and 5.9% as dead. 3.0% were entered as enrolled at more than one place. A reason is what the officer wrote down, and nobody checked it.

Could the removals have changed the 2025 result?

In 68 of the 70 constituencies, more names were left off than the 2025 winning margin. The winning margin is the winner's votes less the runner-up's. Not everyone on a roll votes, so scaled down by each seat's own 2025 turnout it is 66. The election came before the revision, so this measures how large the removals are against the votes that decide a seat. Larger than the margin means large enough to decide a seat, and it says

nothing about whether it would have. Nobody can say how anyone left off would have voted.

Did one party's seats lose more names?

The BJP's 48 seats lost 31.3 per 100 and the AAP's 22 lost 36.0. Set against the rate in their own districts, the two are -0.6 and 0.1 points. So the difference comes mostly from where each party's seats are.

Were women removed more than men?

Men were left off more often than women, 35.3 per 100 men against 29.9 per 100 women, with the roll before the revision by sex as reported in the press. Women were 46.9% of the roll before and 42.8% of the names left off. The split by sex was published for Delhi as a whole only.

Where were the most names left off?

South East district left off the most, 43.6 per 100, and Tughlakabad the most of any constituency, 47.8. 13 constituencies left off 40 or more of every 100, and Rohini the fewest, 16.5.

DELHI 2026

Figures as of 31 August 2026, when the draft roll was published. The final roll is due on 4 December 2026.

Method

1 Delhi's draft roll left off 47.6 lakh names, 32.8 of every 100 electors on the roll before the revision.

2 The constituency figures add up exactly to the Chief Electoral Officer's state figures.

What is counted

The state figures

The Chief Electoral Officer (CEO) keeps Delhi's electoral rolls for the Election Commission. The roll before the revision (1,45,10,299) is the roll of 16 June 2026, the names the booth level officers set out to visit. The draft roll of 31 August 2026 (97,53,577) is the list published once the enumeration forms were collected. The draft by sex, the names left off and their three reasons are from the CEO's press note of 31 August 2026. The roll before, split by sex, is not in that note. It comes from the same day's statement as quoted by Hindustan Times, and it adds up to one fewer than the total, so it is used as published.

The constituency figures

Every elector on the roll was to fill in an enumeration form, and a name whose form was not collected was left off the draft. The CEO published a table of the draft by district and assembly constituency (AC), giving the draft roll by sex and the enumeration forms not collected. The names left off are those forms, and the roll before is the draft plus them. The site is not built unless the 70 constituencies add up exactly to the table's district sums and to the state's roll before, draft and names left off, and they do. The

same table, as published in the data behind Business Standard's map, agrees with it in every row.

Districts

The districts are the 13 that the CEO's table uses, the districts Delhi has now. The 2025 roll used 11.

The 2025 result

Winner, runner-up and winning margin (the winner's votes less the runner-up's) for every seat come from the Election Commission's results of the February 2025 election, and the electors at that poll from the Chief Electoral Officer's turnout table. Margins are computed from the votes themselves. Two published compilations print New Delhi's margin as 4,199 and Patparganj's as 28,702, and the votes give 4,089 and 28,072.

After the draft

After the draft, an elector asks to be added with Form 6, and an objection to a name already on the roll is made with Form 7. Some electors left on the draft are also sent a notice to prove their entry. The Form 6 and Form 7 counts and the notices are as reported in the press, quoting the CEO. Claims and objections run to 30 October 2026.

What these tables cannot show

- The reasons, or the split by sex, in each constituency or district. These were published for Delhi as a whole only. A count of the reasons by constituency exists, made by others from the lists of named electors, and it is not used here.
- How many of those left off will be put back. There is no final roll yet.
- Whether each removal was right, or how anyone left off would have voted.

Downloads

The constituency and district tables behind every chart are on the Downloads page, which the Downloads button at the top of the page opens.

Analysis of the named lists

This site publishes counts only, never a name. For analysis that looks at named voters in Delhi, see the Sabar Institute's report on the Delhi revision.

Questions about this page

Where do the figures come from?

The state figures are the press note of 31 August 2026 from the Chief Electoral Officer, who keeps Delhi's rolls. The constituency figures are the Chief Electoral Officer's own table of the draft, by district and constituency, and they add up exactly to the state figures. The 2025 result is the Election Commission's. The method page has every link.
