What the Election Commission should do

Method and sources

Every constituency

In short

1. Kerala's draft roll, the list published on 23 December 2025 for electors to check and contest, was 23.7 lakh smaller than its roll of January 2025. That is 8.5 of every 100 electors.
2. In 74 of the 140 assembly constituencies, the seats of the state legislature, the roll fell by more at the draft than the 2026 winning margin, the votes by which the winner beat the runner-up. By the election the roll had grown back by 17.0 lakh since the draft, new voters included, and was still smaller than in January 2025 by more than the margin in 38 seats, large enough to decide them.
3. Women were 55.3% of that fall, against 51.7% of the roll, and more than their share in all 14 districts.
4. Thiruvananthapuram fell most, by 14.0 per 100, and Kannur least, by 4.7.
5. By the 2026 election the roll had risen 17.0 lakh from the draft, which counts new voters as well as names put back, and it was 6.7 lakh smaller than in January 2025.

No count of the names removed is published by constituency. So these figures measure the fall in the roll, how much smaller each roll was than in January 2025. That fall takes in ordinary changes as well as the revision, and it is a different count from the names struck off.

The roll

23.7 lakh
smaller at the draft

8.5
per 100 electors

55.3%
of the fall were women

6.7 lakh
smaller at the election

Constituency by constituency

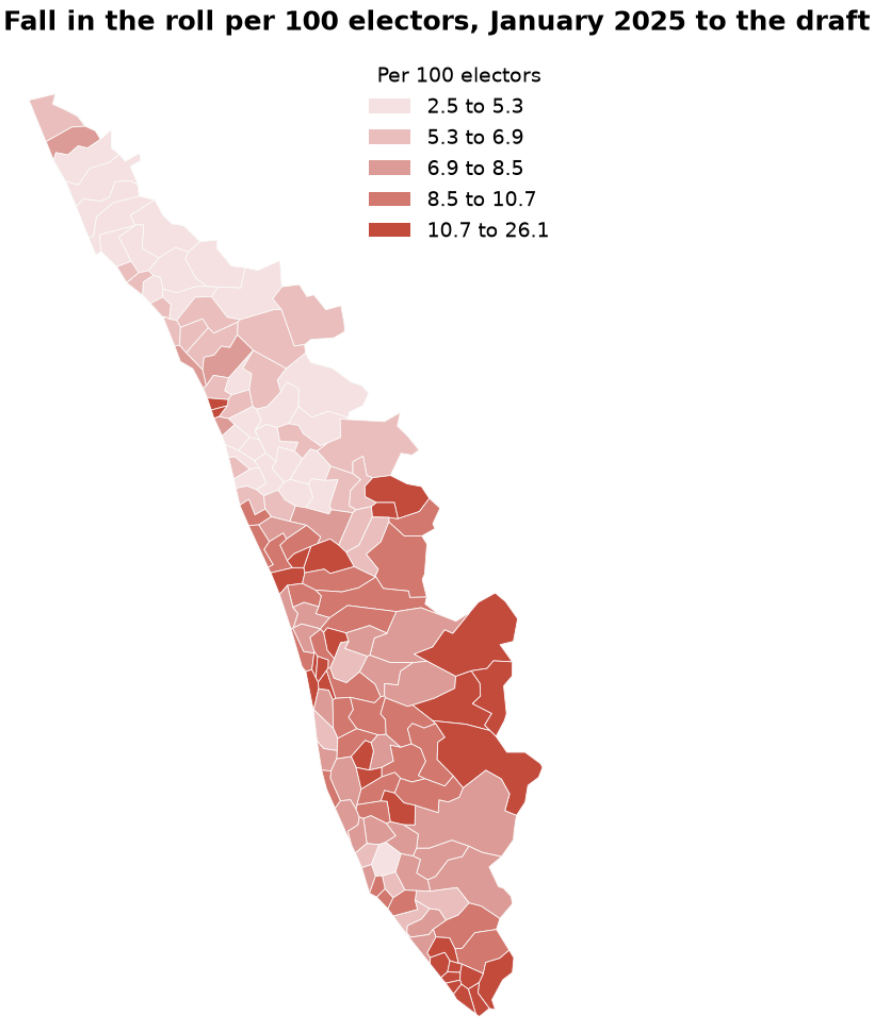

Figure 1. Each constituency shaded by how much smaller its roll was at the draft than in January 2025, for every 100 electors, in five bins with equal numbers of seats. Boundaries from DataMeet's assembly constituency map (CC BY 2.5 India), simplified.

Across the 140 constituencies the fall at the draft runs from 2.5 per 100 in Nilambur to 26.1 in Thiruvananthapuram.

The roll, step by step

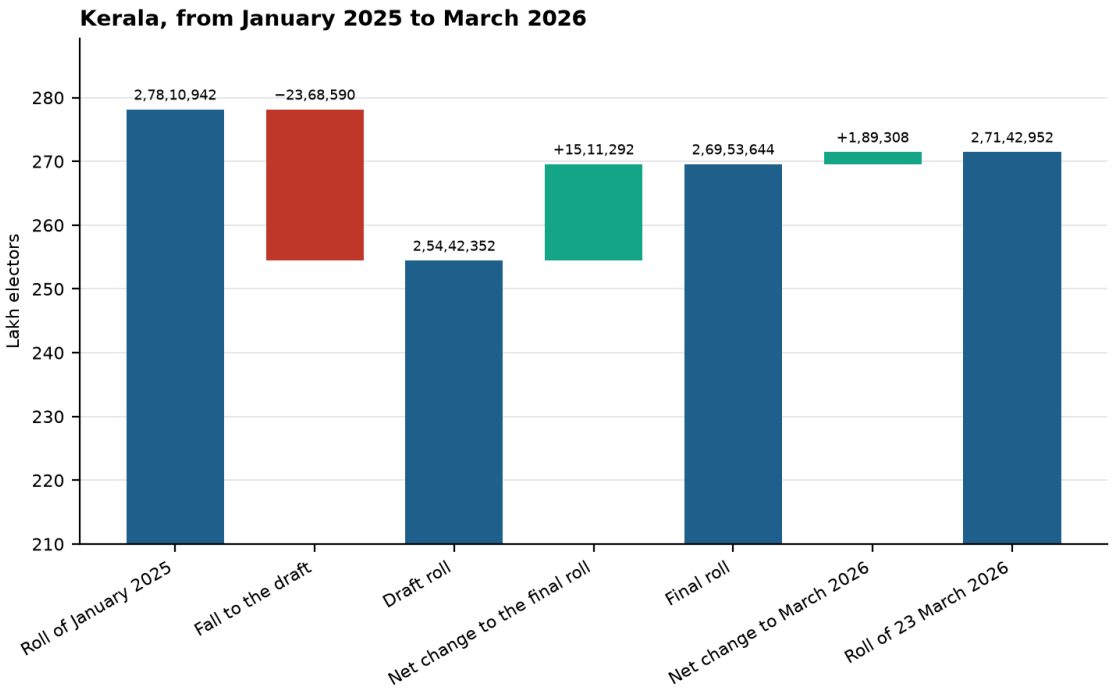

Figure 2. From the final roll of the 2025 summary revision to the roll the election was held on. The bars start above zero so that the changes can be seen.

The draft roll of 23 December 2025 was 23.7 lakh smaller than the roll of 6 January 2025, 8.5 of every 100 electors. The final roll of 21 February 2026 and the additions before the election brought back 17.0 lakh, so the roll of 23 March 2026, on which the election was held, was 6.7 lakh smaller than in January 2025. The rise after the draft counts new voters as well as names put back.

Per 100 electors, by district

The Chief Electoral Officer, who keeps the state's rolls for the Election Commission, has published no count of the names left off the draft, by district or constituency. Every roll is published by constituency, so what follows is each district's fall from the roll of January 2025 to the draft. It takes in the ordinary changes of 2025 as well as the revision, though for the state the fall, 23.7 lakh, is within half a lakh of the 24.1 lakh names reported left off with the draft.

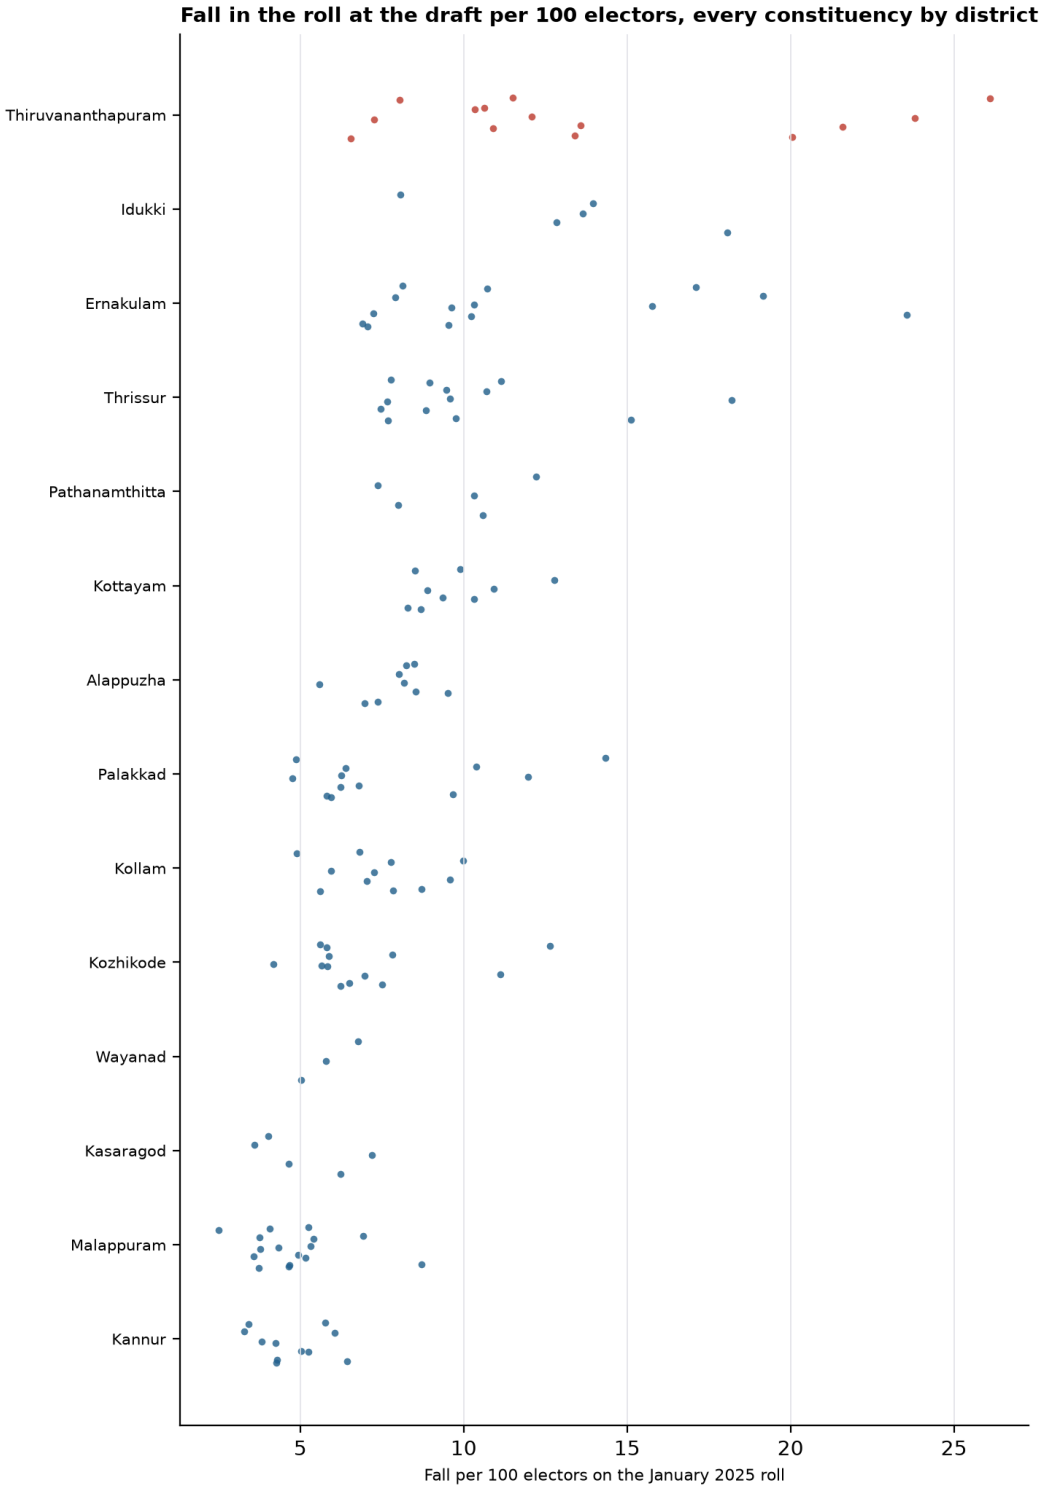

Figure 3. Each dot is a constituency. Districts from the largest fall to the smallest. Thiruvananthapuram in red.

Thiruvananthapuram's roll was 14.0 per 100 smaller at the draft, against 8.5 for the state. Idukki and Ernakulam come next. Kannur fell the least, 4.7.

The reasons

No reasons have been published. The Chief Electoral Officer has given no split of the names left off by reason, by constituency or for the state, so none of the figures here can say how many were entered as dead, shifted or absent.

Women

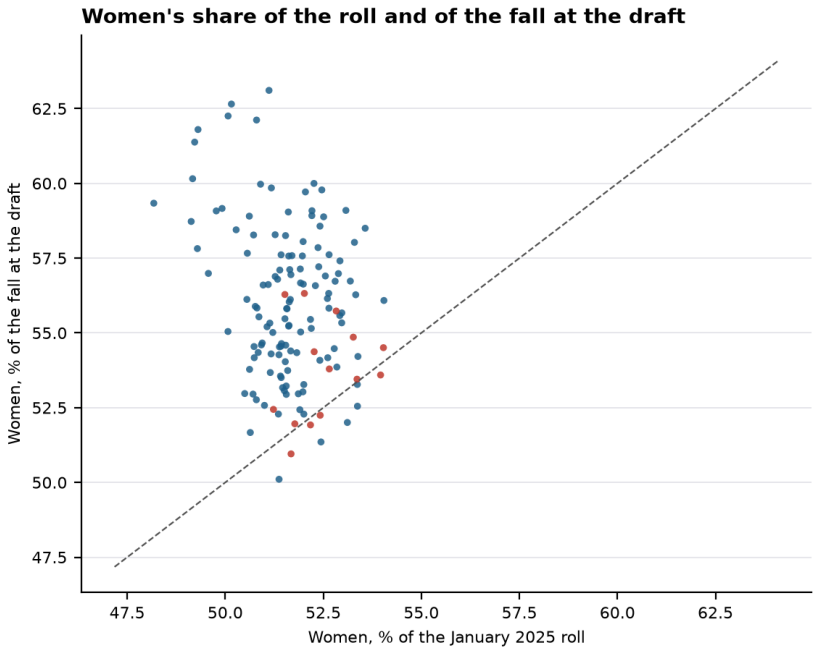

Figure 4. Each dot is a constituency. Dots above the dashed line are seats where more women left the roll than their share of it. Thiruvananthapuram district in red.

Women were 55.3% of the fall to the draft, against 51.7% of the roll before it. They were more than their share in all 14 districts and in 131 of the 140 constituencies. Of the rise after the draft, women were 50.8%.

After the draft

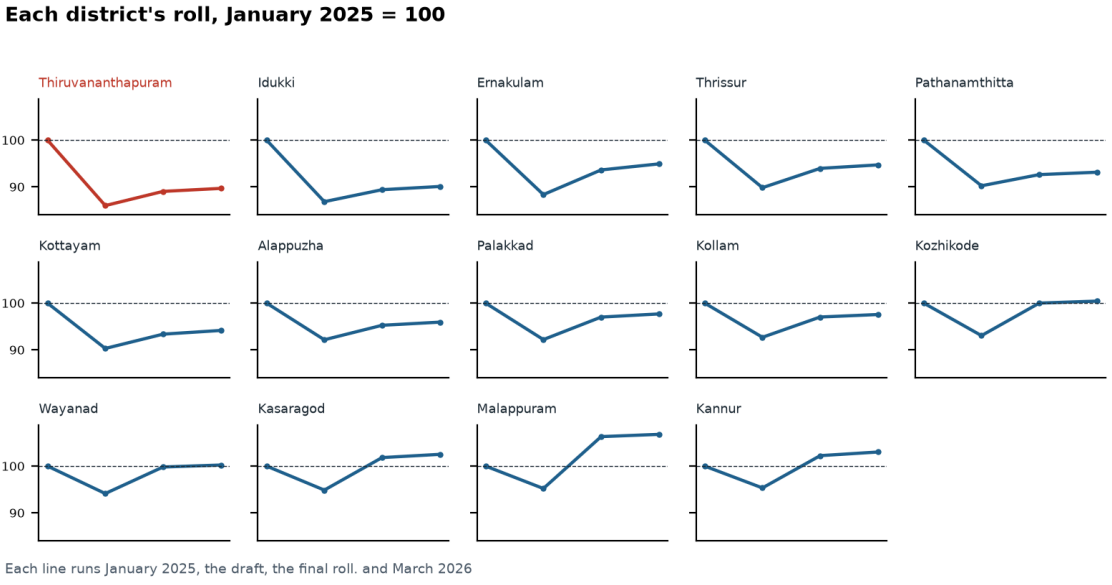

Figure 5. Each small chart follows one district's roll through the four published rolls. The dashed line is the January level. Thiruvananthapuram in red.

In Thiruvananthapuram and Idukki the roll was still about 10 per 100 smaller at the election than in January 2025. In 5 districts it had grown past its January size by the election, Kozhikode, Wayanad, Kasaragod, Malappuram and Kannur. The rise after the draft counts new voters, including those who

turned eighteen and those registered abroad, as well as names put back, so it cannot show how many of those left off were restored.

Every district

District	Seats	Roll Jan 2025	Draft roll	Final roll	Roll Mar 2026	Fall per 100 at draft	Fall per 100 at election	Women, % of fall
Thiruvananthapuram	14	28,37,653	24,40,242	25,26,325	25,44,574	14.0	10.3	53.3
Idukki	5	8,94,112	7,76,381	7,99,254	8,05,427	13.2	9.9	53.6
Ernakulam	14	26,38,106	23,30,643	24,69,794	25,03,848	11.7	5.1	53.2
Thrissur	13	26,74,625	24,02,432	25,12,921	25,32,715	10.2	5.3	57.6
Pathanamthitta	5	10,52,468	9,49,632	9,74,802	9,80,144	9.8	6.9	56.7
Kottayam	9	16,05,528	14,49,740	14,98,824	15,11,580	9.7	5.9	54.3
Alappuzha	9	17,54,164	16,16,561	16,70,847	16,82,697	7.8	4.1	56.6
Palakkad	12	23,22,579	21,41,276	22,53,073	22,68,721	7.8	2.3	55.7
Kollam	11	21,40,376	19,83,885	20,76,671	20,87,992	7.3	2.4	54.4
Kozhikode	13	26,57,561	24,72,668	26,57,478	26,68,817	7.0	-0.4	56.5
Wayanad	3	6,42,200	6,04,487	6,40,947	6,43,625	5.9	-0.2	53.2
Kasaragod	5	10,76,634	10,21,345	10,96,241	11,03,618	5.1	-2.5	58.4
Malappuram	16	34,01,577	32,38,452	36,15,970	36,32,210	4.8	-6.8	59.9
Kannur	11	21,13,359	20,14,608	21,60,497	21,76,984	4.7	-3.0	54.3

The 2026 election

The fall at the draft against the winning margin

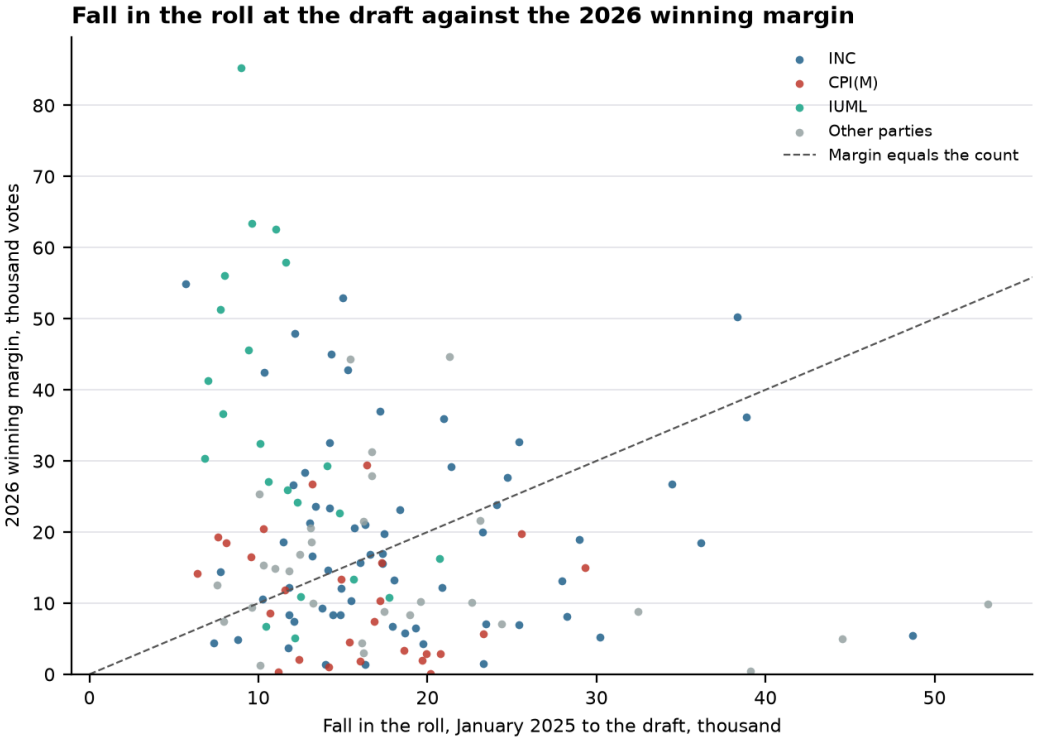

Figure 6. Each dot is a constituency, coloured by the party that won it. Dots below the dashed line are seats where the roll fell by more than the winner won by.

In 74 of the 140 constituencies, the roll fell by more at the draft than the 2026 winning margin. The fall and the margin as a share of votes are close to unrelated. Their rank correlation, a measure that runs from -1 to 1 and is near 0 when two things do not move together, is -0.15.

How many seats, on each count

74 of 140
fall to the draft roll

38 of 140
fall to the election roll

30 of 140
fall to the election roll, at turnout

The first count stops at the draft roll. The second runs to the roll the election was held on, after the names added on claims and before the poll. The third counts the second at the seat's own 2026 turnout. By the election the roll had grown back by 17.0 lakh since the draft, new voters included, and was still smaller than in January 2025 by more than the margin in 38 seats, large enough to decide them. Counted at each seat's own turnout, that is 30 seats. Nobody can know how anyone missing from the roll would have voted.

The fall by the party that won

Party that won	Seats	Fall per 100 at draft	Against own district	Draft fall over margin
INC	63	9.4	+0.4	18
CPI(M)	26	7.8	-1.0	10
IUML	22	5.5	-0.3	0
CPI	8	8.5	-0.6	2
KEC	7	9.1	-1.3	3
IND	4	6.3	-0.2	1
BJP	3	17.0	+5.0	3
RSP	3	7.2	+0.1	0
CMP	1	26.1	+12.1	1
KEC(J)	1	10.3	-1.3	0
RJD	1	5.0	+0.3	0
RMPI	1	6.2	-0.7	0

The INC won 63 seats, the CPI(M) 26 and the IUML 22. The roll fell at the draft by 9.4 per 100 in the INC's seats, 7.8 in the CPI(M)'s and 5.5 in the IUML's. Set against the fall in their own districts they come out at +0.4, -1.0 and -0.3, so most of the difference comes from where the seats are.

What these tables show and what they cannot

The tables show how much smaller every constituency's roll was at the draft and at the election than in January 2025, by sex, and how that compares with the 2026 margins.

- How many names were removed in each district or constituency, or on what recorded reason.
- How many of those left off were put back.
- Whether each removal was right, or how anyone missing from the roll would have voted. No list of removals can show intent.

What the Election Commission should do

Kerala's draft roll was 23.7 lakh smaller than its roll of January 2025, and no table of the names left off has been published. The Election Commission should do four things.

1. Publish the names left off the draft by constituency and polling station, with the reason and the sex of each.
2. Explain why women were 55.3% of the fall at the draft, against 51.7% of the roll.
3. Publish how many of those added for the final roll had been left off the draft, so that names restored can be told apart from new voters and electors registered abroad.
4. Explain why Thiruvananthapuram lost 14.0 of every 100 electors at the draft, 3.0 times the rate of Kannur.

Method and sources

The Chief Electoral Officer, Kerala, publishes every roll by assembly constituency and sex. These figures use four of them, the final roll of the 2025 summary revision (6 January 2025), the draft roll of the Special Intensive Revision (23 December 2025), its final roll (21 February 2026) and the roll of 23 March 2026, on which the election was held. Each adds up to its own district and state totals.

No table of the names left off the draft has been published, by constituency or for the state. The figures measure how much smaller each roll was at the draft than in January 2025. That fall, 23,68,590 in all, takes in the ordinary changes of 2025 as well as the revision. The count of names left off reported with the draft was 24,08,503. The draft plus that count comes to 2,78,50,855, which matches the roll frozen for the revision in October 2025 as the press reported it, a little more than the January roll. So for the state the fall and the removals are close. For a single constituency they may differ more.

The rise from the draft to the final roll and to the roll of March 2026 is the names added less those removed. It counts new voters, including those who turned eighteen and those registered abroad, as well as names put back.

The 2026 winner, runner-up and margin are from the Election Commission's constituency result pages, checked against its state-wise pages. Turnout is votes over the roll of 23 March 2026. Party comparisons are by party, because the fronts of the independents are not in the data. Each seat's fall per 100 is also set against the fall of its own district, and those differences are averaged for each party's seats. The map uses DataMeet's assembly constituency map, licensed CC BY 2.5 India. Only counts are published, never a name, EPIC number or address.
