GUJARAT 2026

Figures as of 17 February 2026, when the final roll was published.

Overview

1. Gujarat's draft roll of 19 December 2025 left off 73.7 lakh names, 14.5 of every 100 electors on the roll before the revision.

2. In 98 of the 182 constituencies, more names were left off than the 2022 winning margin, and in 60 even leaving out the names entered as dead or as enrolled elsewhere.

3. Ahmedabad and Surat districts hold 21.9% of the state's roll and 36.7% of the names left off. They lost 24.3 of every 100 electors, against 11.8 in the other 31 districts.

4. Surat left off the most, 25.7 per 100, and Karanj the most of any constituency, 38.4. Dangs left off the fewest of the districts, 5.5.

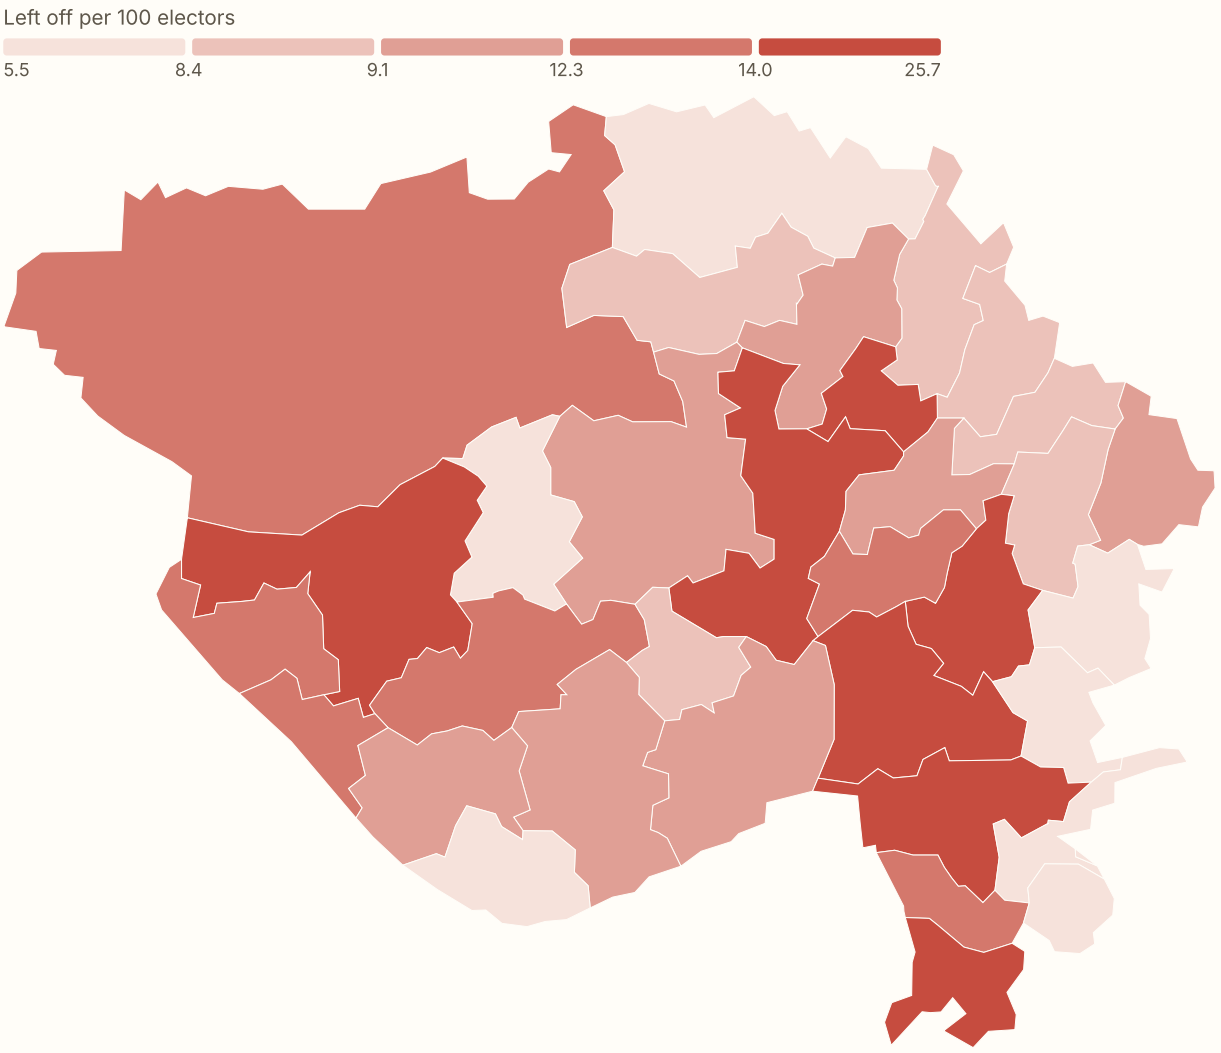

5. The final roll of 17 February 2026 is 5.6 lakh larger than the draft, at most 7.6% of the names left off, and still 68.1 lakh smaller than the roll before the revision.

The revision's figures on this page are the tables of the Chief Electoral Officer (CEO), who keeps Gujarat's rolls for the Election Commission, as they were published in the press. The CEO's own website carries none of them. Sources and method says where each one comes from.

Find a constituency or district

An assembly constituency is the area that elects one member of the state assembly, and Gujarat has 182 of them in 33 districts. Type a constituency's name or number, or a district, and its figures appear below with a link you can send. The map is drawn by

district, because the boundary map available has no separate shapes for the city seats of Ahmedabad and Surat. Picking a constituency outlines its district.

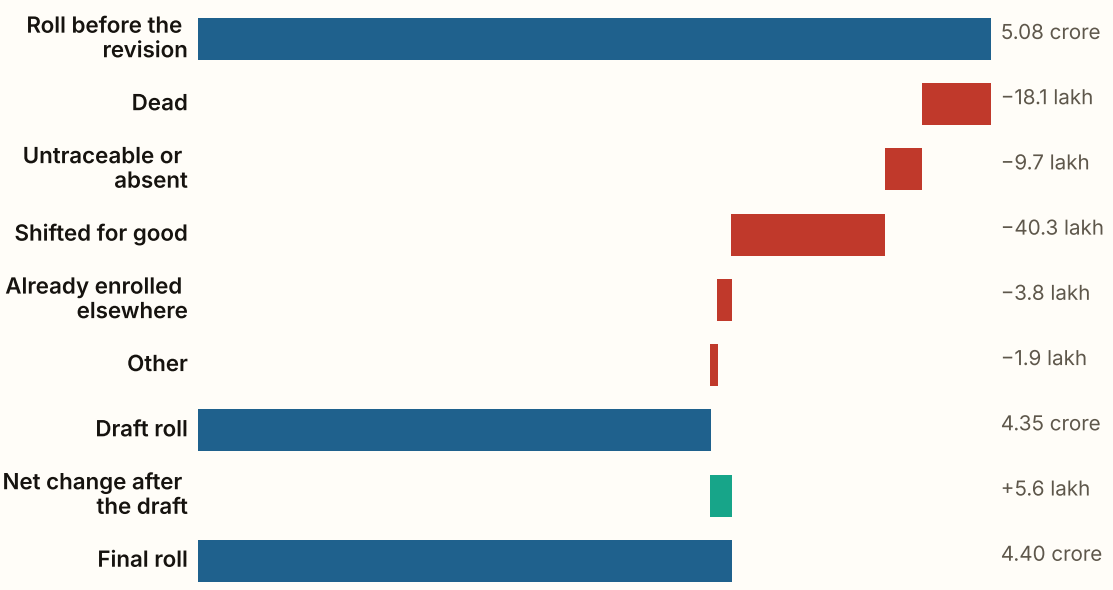

Each district is shaded by the names left off its draft roll for every 100 electors on its roll before the revision. Tap a district for its figures. District boundaries drawn from DataMeet's assembly constituency map (CC BY 2.5 India), with each constituency placed in its district.

The roll, step by step

The roll before the revision is the list of electors when the revision began, the roll as of 1 October 2025. Every elector on it was given an enumeration form, a short form to fill in and hand back to the booth level officer, the official who looks after the roll for one polling booth. The draft roll of 19 December 2025 is the list published once the forms were collected, and a name whose form did not come back was left off it, with one of five reasons entered against it. After the draft, electors could ask to be added or object

to names on it, and the final roll of 17 February 2026 is the draft once those were decided. The bars start above zero so that the changes can be seen.

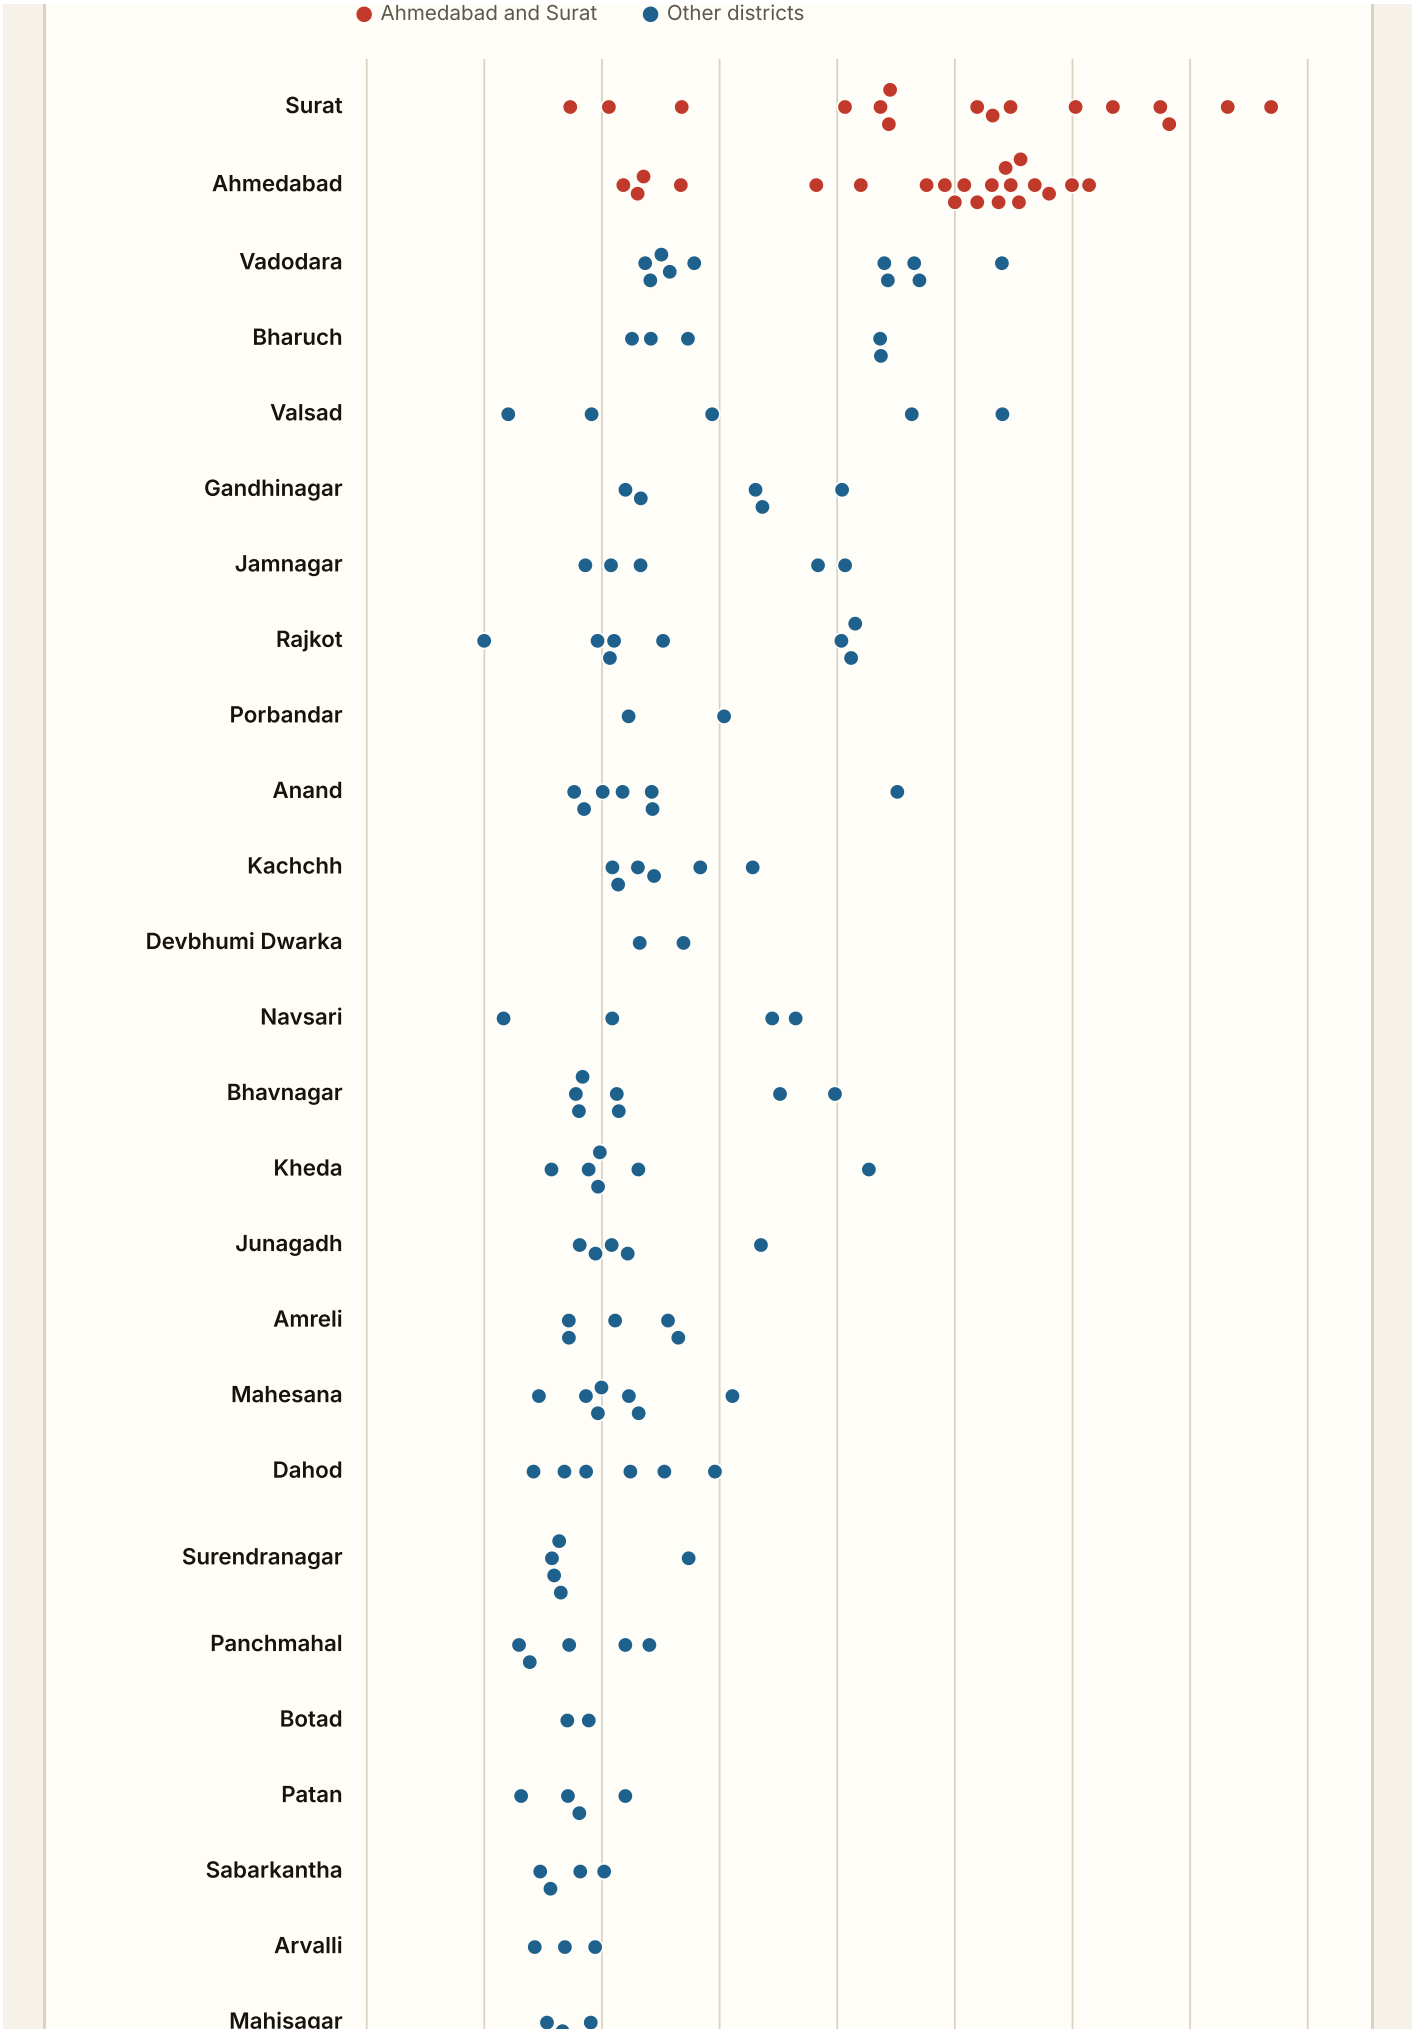

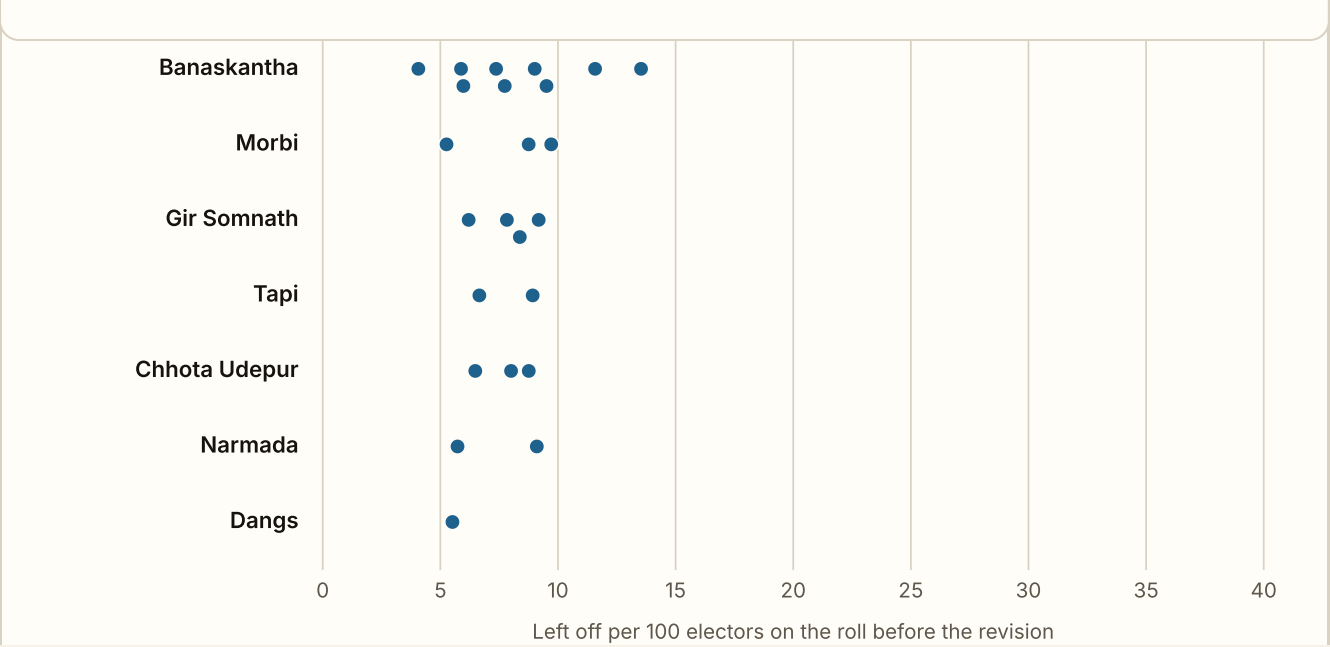

> **The draft roll left off 73.7 lakh names, 14.5 of every 100 electors on the roll before the revision.** The roll fell from 5.08 crore names to 4.35 crore (one crore is ten million). The final roll of 17 February 2026 holds 4.40 crore. It is 5.6 lakh larger than the draft and still 68.1 lakh smaller than the roll before the revision.

Gujarat's dates, as they were set and as they were moved, are drawn beside every other state's on How the revision was run.

Per 100 electors, by district

Each dot is one constituency's names left off, for every 100 electors on its roll before the revision. Counting per 100 electors puts large and small constituencies on one scale, so a rate of 25 means one elector in four was left off. The constituencies are grouped by district, with the district that lost the most at the top. Ahmedabad and Surat are in red. Hover or tap a dot for its name.

> **Surat left off 25.7 of every 100 electors and Ahmedabad 23.2, against 14.5 for the state.** Vadodara comes next, at 18.7, and Dangs left off the fewest, 5.5. Of the 182 constituencies, 23 left off 25 or more of every 100 and 70 fewer than 10. Karanj in Surat left off the most, 38.4, and Tharad in Banaskantha the fewest, 4.1.

The reasons

Every name left off carries one of five reasons. The elector had died, could not be traced or was absent, had shifted for good, was already enrolled at another place, or the form was not collected for some other reason. The first chart counts each reason for the state, in lakh (one lakh is 100,000). The second gives each district's split, as a share of its own names left off, with the districts in the same order as above. A reason is what the officer wrote down, and nobody checked it.

	Dead	Untraceable or absent	Shifted for good	Already enrolled elsewhere	Other
Surat	12%	10%	69%	4%	6%
Ahmedabad	17%	15%	59%	4%	4%

Amreli	25%	11%	61%	3%	1%
Mahesana	29%	8%	55%	8%	1%
Dahod	32%	11%	46%	10%	0%
Surendranagar	31%	11%	52%	4%	1%
Panchmahal	41%	9%	43%	6%	1%
Botad	25%	6%	65%	4%	0%
Patan	24%	12%	54%	6%	4%
Sabarkantha	33%	11%	45%	9%	1%
Arvalli	37%	6%	49%	7%	0%
Mahisagar	41%	5%	45%	9%	0%
Banaskantha	30%	10%	51%	9%	0%
Morbi	34%	7%	53%	5%	1%
Gir Somnath	37%	13%	40%	10%	0%
Tapi	39%	17%	39%	4%	1%
Chhota Udepur	42%	6%	43%	7%	2%
Narmada	40%	11%	41%	6%	2%
Dangs	36%	9%	50%	5%	1%

54.6% of the names left off were entered as shifted for good, 24.5% as dead and 13.2% as untraceable or absent. 5.2% were already enrolled at another place and 2.6% were left off for some other reason. The share entered as shifted is highest in Surat, at 68.8%. Where fewer names were left off, more of them were entered as dead, up to 42.3% in Chhota Udepur. Across the 182 constituencies the rank correlation between the rate left off and the share entered as dead is -0.73. A rank correlation runs from minus 1, where one

measure falls in step as the other rises, through 0, where the two are unrelated, to 1, where they rise in step.

Ahmedabad and Surat

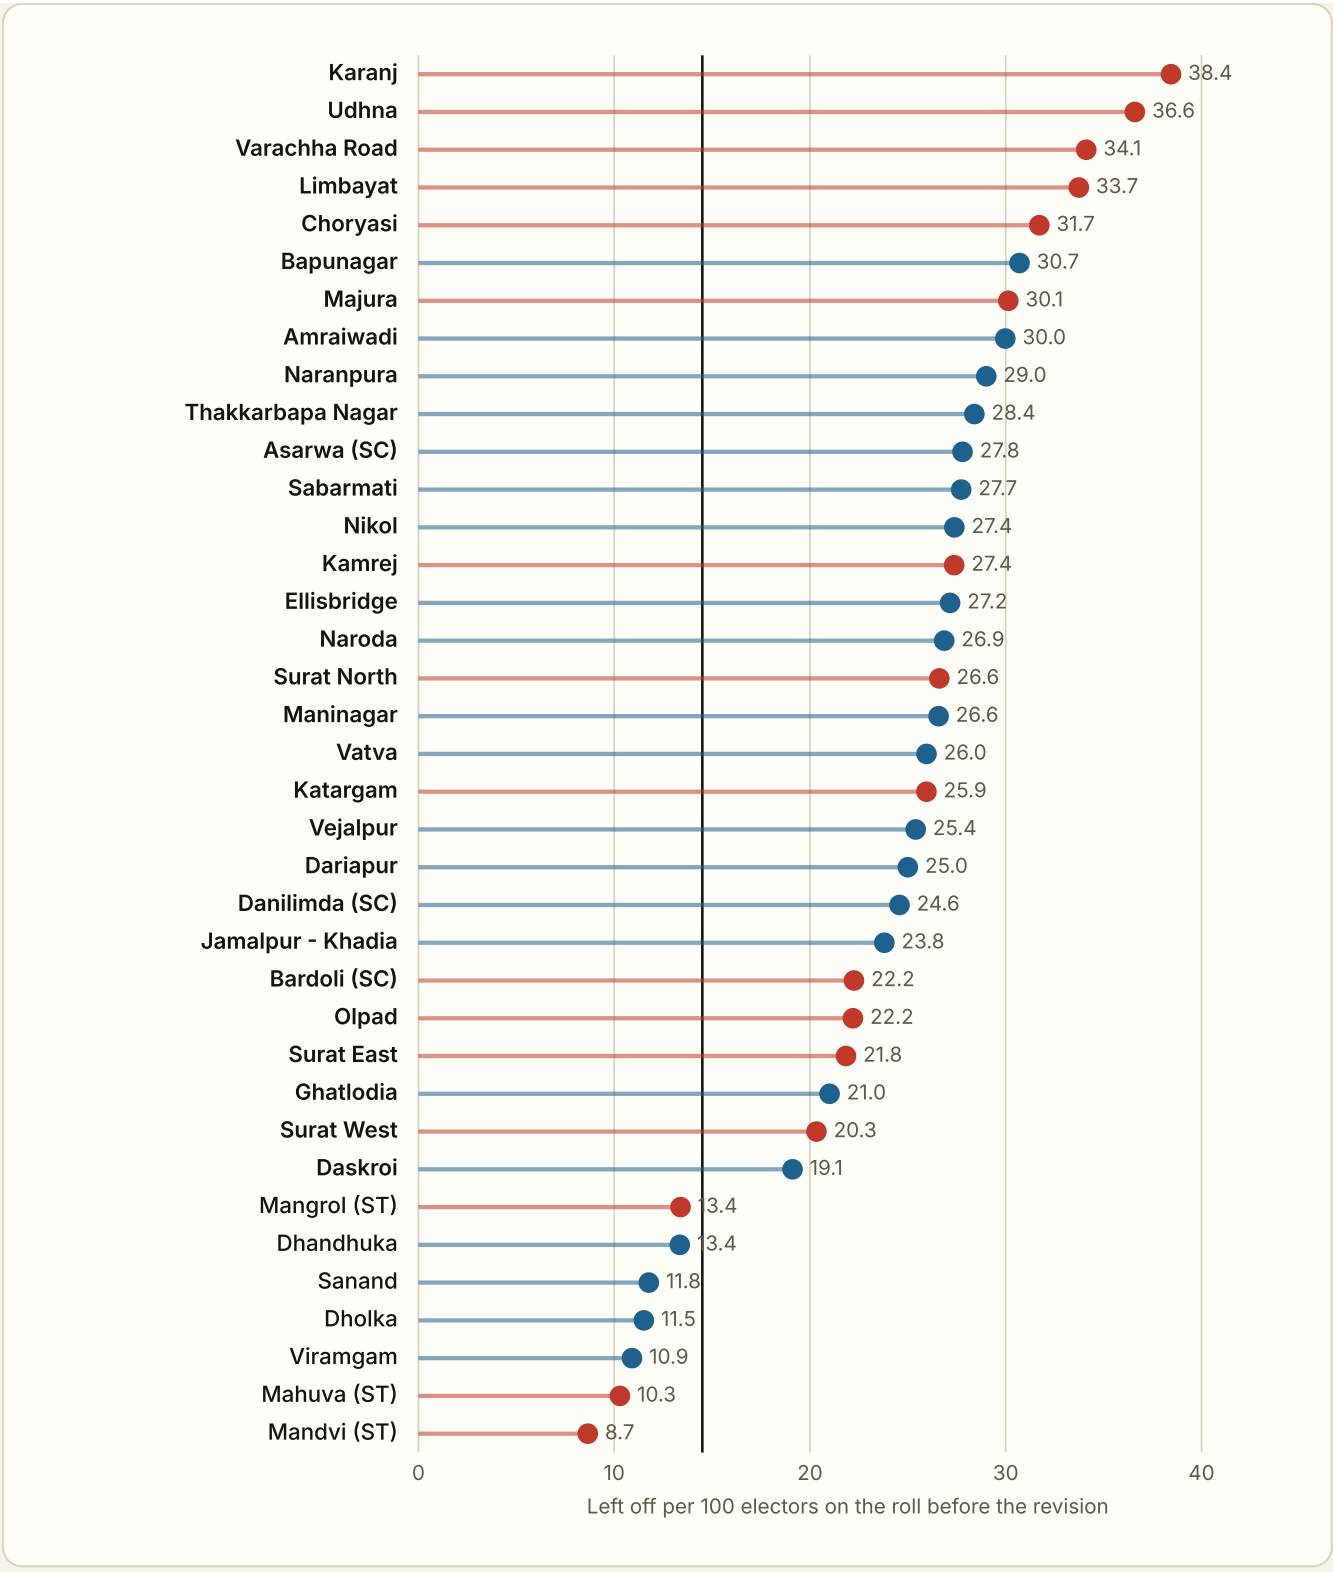

Ahmedabad and Surat districts hold the state's two largest cities. Here their constituencies are set against the other 31 districts.

21.9%
of the state's roll before the revision

36.7%
of the names left off

24.3
left off per 100 electors, against 11.8 in the other 31 districts

Every constituency in the two districts, by the names left off for every 100 electors. The upright line marks the rate for the state as a whole.

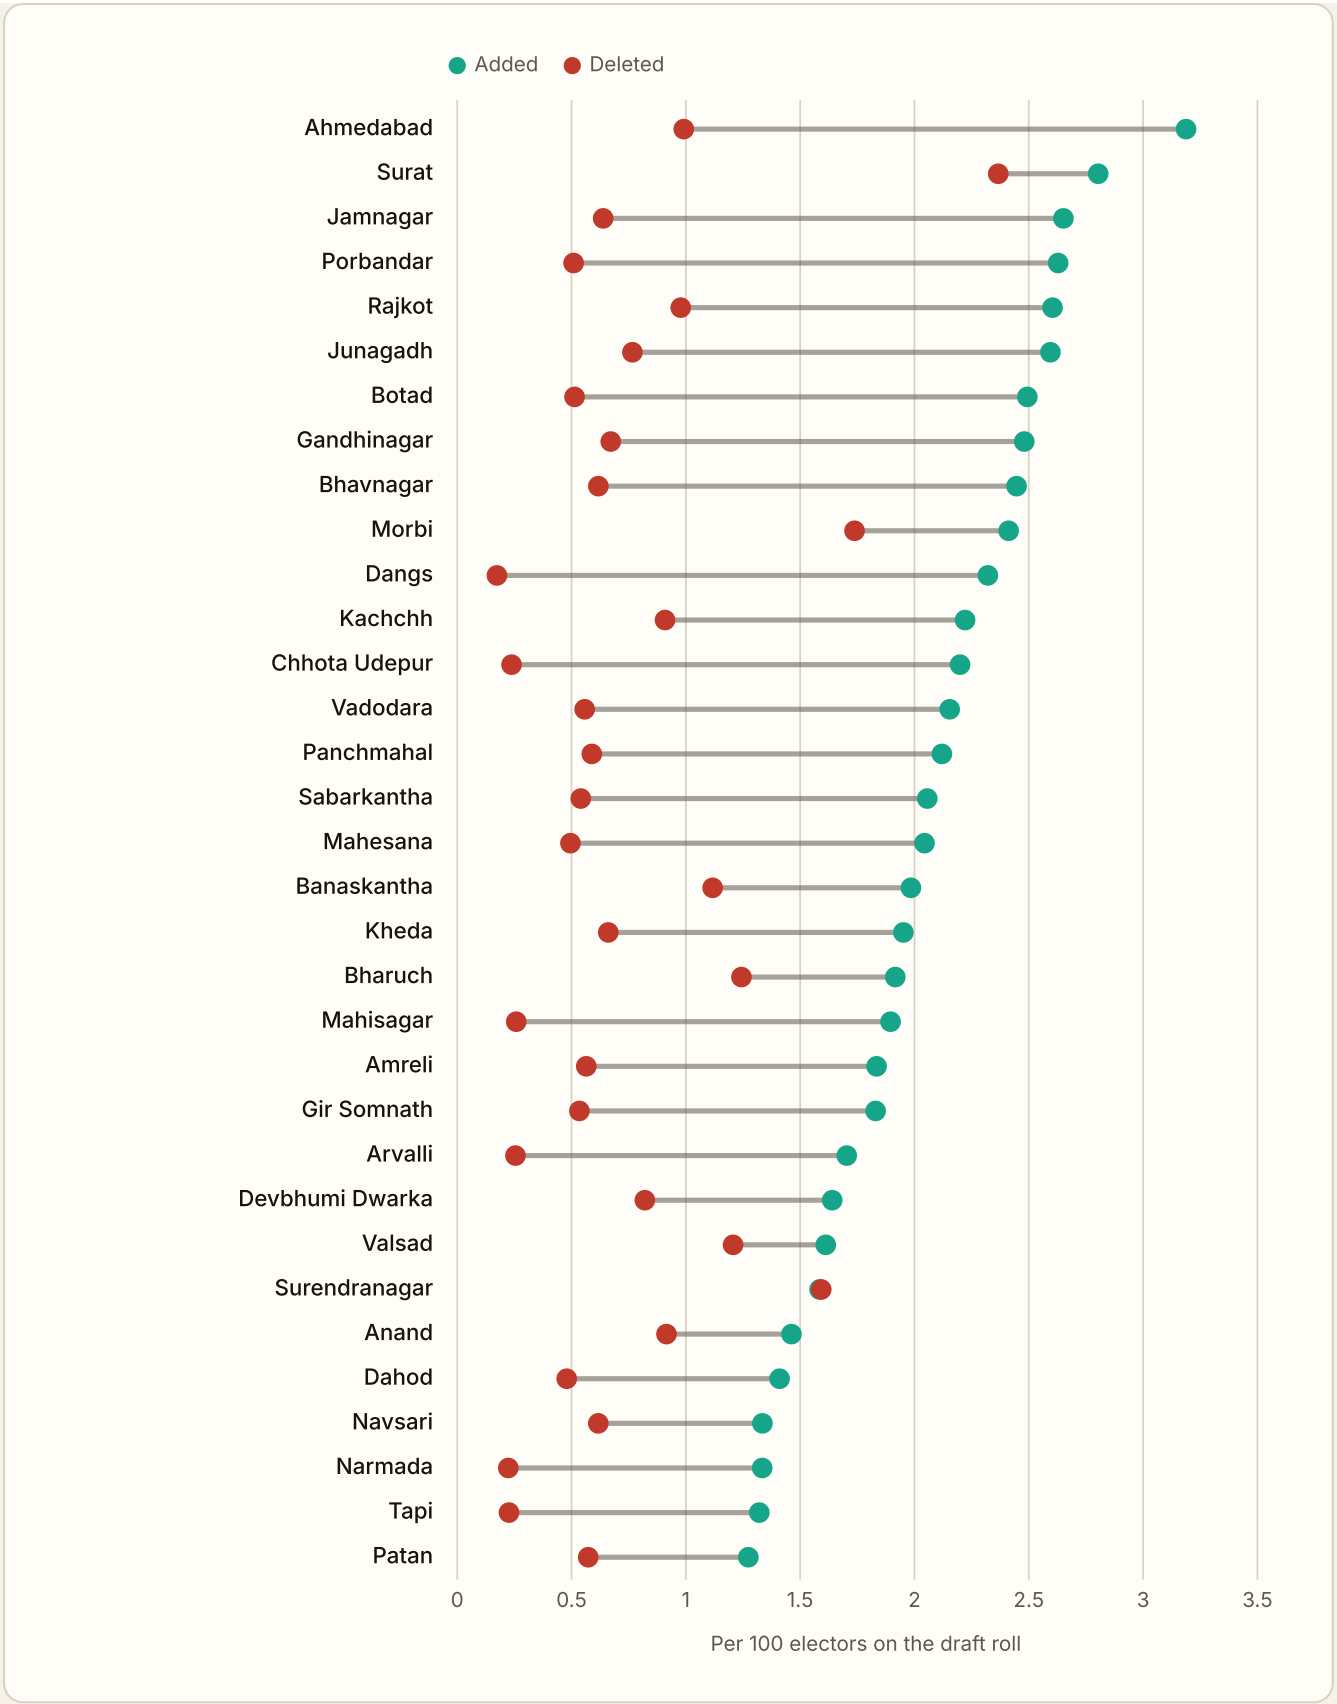

Ahmedabad and Surat hold 21.9% of Gujarat's roll and 36.7% of the names left off, 27.0 lakh names in all. Their 37 constituencies lost 24.3 of every 100 electors, against 11.8 in the rest of the state, and 30 of the 37 lost more than the state's 14.5. In the chart Surat's seats are in red and Ahmedabad's in blue. 63.8% of the two districts' names were entered as shifted for good, against 49.3% elsewhere, and 14.8% as dead, against 30.1%. In Surat district, 68.8% were entered as shifted.

Women

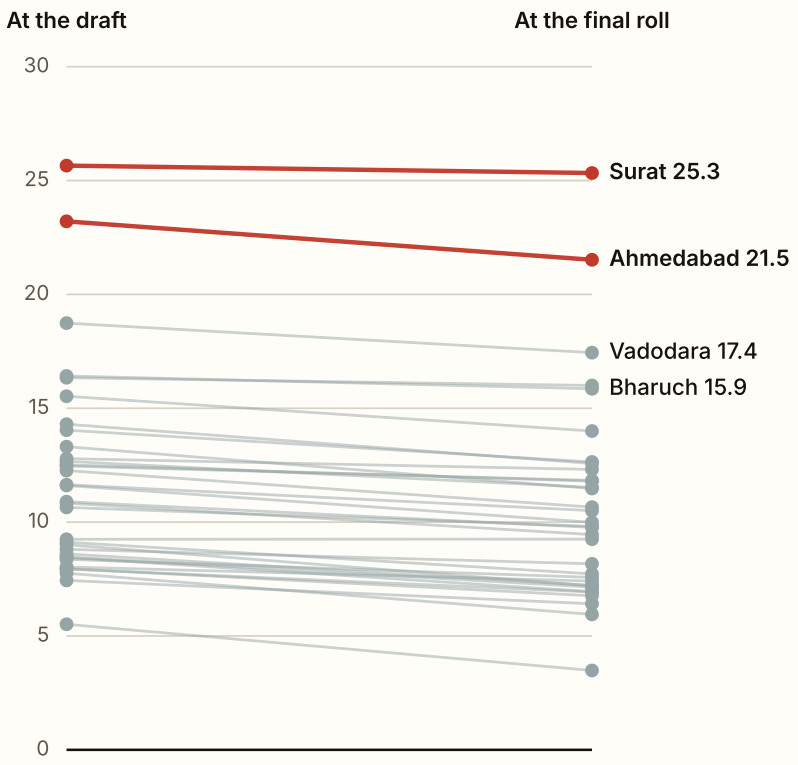

> **None of the tables published for Gujarat counts anything by sex.** The CEO's tables give the roll before the revision, the names left off, the draft and the final roll as totals only, for the state, the districts and the constituencies. So nobody outside the Election Commission can yet say whether women were left off more often than men, here or in any district.

After the draft

After the draft, an elector asks to be added with Form 6, and an objection to a name already on the roll is made with Form 7. The CEO's table of the final roll gives, for each district, the names added and the names deleted between the draft and the final roll, here counted for every 100 electors on the district's draft. It prints Vav-Tharad, a district formed from part of Banaskantha, on its own line, and here it is counted with Banaskantha, as in the tables of the draft.

Each line is a district. Its left end is the names left off the draft for every 100 electors on the roll before the revision. Its right end is the fall that still remains on the final roll. The flatter the line, the less was made up. Ahmedabad and Surat are in red. Hover or tap a line for its district.

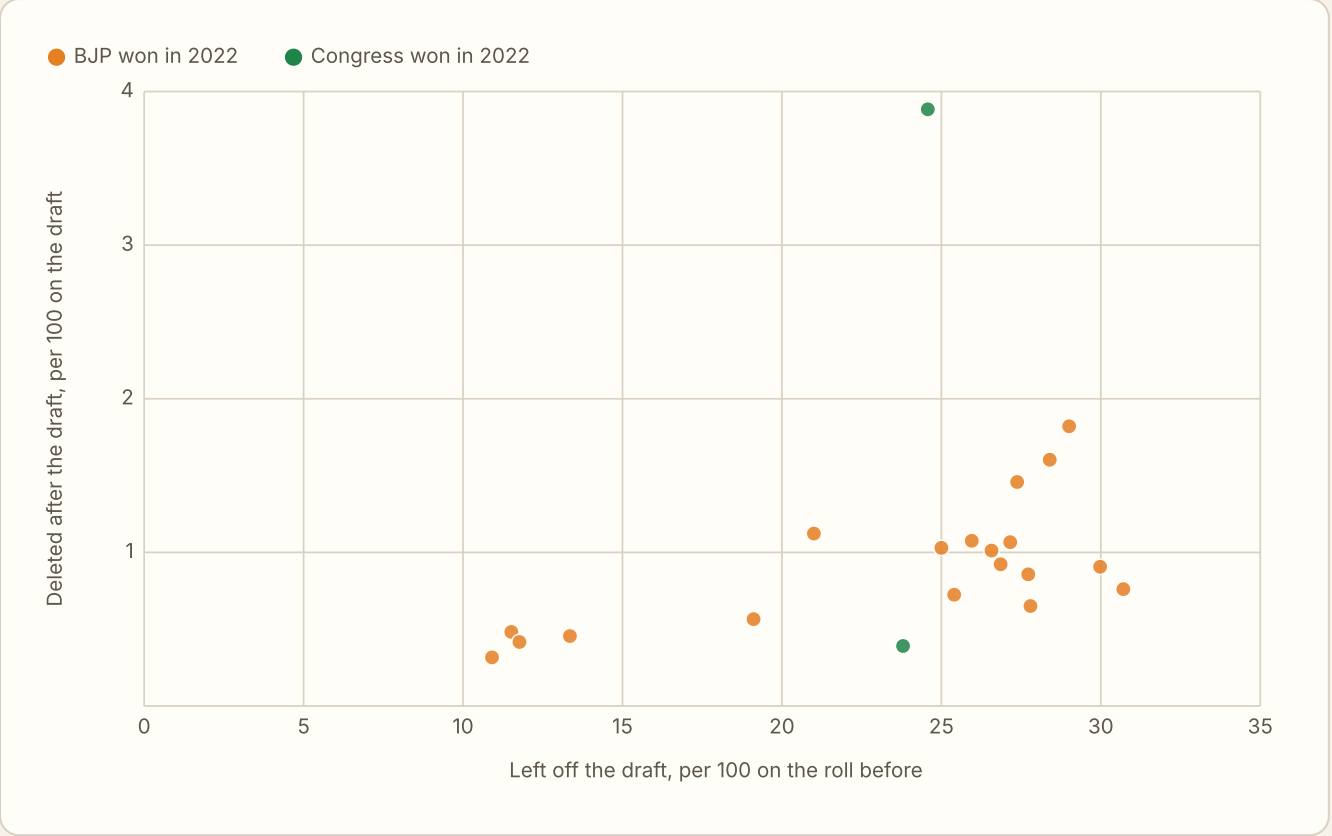

> **Between the draft and the final roll, 9.6 lakh names were added and 4.0 lakh deleted, a net rise of 5.6 lakh.** That is at most 7.6% of the names left off the draft, because the names added count new voters as well as names put back. The final roll is still 13.4 of every 100 electors smaller than the roll before the revision. Ahmedabad added the most for its size, 3.2 per 100 on its draft. Surat deleted the most names, 85,734, so its roll rose by 15,844 only. Surendranagar deleted more names than it added. Ahmedabad's roll is 21.5 per 100 and Surat's 25.3 per 100 smaller than before the revision.

Of the electors kept on the draft roll, about 44.0 lakh were to be sent a notice to prove their entry at a hearing, 10.1 of every 100, according to The Times of India of 7 January 2026. How many names were deleted after a hearing has not been published separately. The deletions above count every name taken off between the draft and the final roll.

Ahmedabad, seat by seat after the draft

The final roll was published by district, and for Ahmedabad's 21 constituencies the names added and deleted after the draft were printed by Gujarat Samachar on 17 February 2026. They add up exactly to the CEO's Ahmedabad row. Each dot is a

constituency. Its place across is the names left off its draft for every 100 on its roll before the revision, and its height the names deleted after the draft for every 100 on its draft.

Danilimda (SC) lost the most after the draft, 8,289 names, 3.9 for every 100 on its draft, and it is the only one of the 21 seats whose final roll is smaller than its draft. Across the 21, the seats that lost more names at the draft also lost more after it (rank correlation 0.51). Ghatlodia added the most, 22,094. The names added count people enrolling for the first time too, so they say little about names put back. These seat figures are from the press.

The figures are the tables of the Chief Electoral Officer (CEO), who keeps the state's rolls for the Election Commission, as published in the press. The CEO's own website carries none of them. Nothing is split by sex or age, and the final roll is by district only.

Questions about this page

How many names did the revision leave off in Gujarat?

Gujarat's draft roll of 19 December 2025 left off 73.7 lakh names, 14.5 of every 100 electors on the roll before the revision. The draft roll is the list published once the enumeration forms were collected. Every elector on the roll was given a form to fill in and return, and a name whose form did not come back was left off the draft. The roll before the revision held 5.08 crore names and the draft 4.35 crore. One crore is ten million.

Why were the names left off?

54.6% of the names left off were entered as shifted for good, 24.5% as dead and 13.2% as untraceable or absent. 5.2% were already enrolled at another place and 2.6% were left off for some other reason. A reason is what the officer wrote down, and nobody checked it.

Where were the most names left off?

Surat left off the most, 25.7 per 100, and Karanj the most of any constituency, 38.4. Dangs left off the fewest of the districts, 5.5. 23 of the 182 constituencies left off 25 or more of every 100 electors.

How do Ahmedabad and Surat compare with the rest of the state?

Ahmedabad and Surat districts hold 21.9% of the state's roll and 36.7% of the names left off. They lost 24.3 of every 100 electors, against 11.8 in the other 31 districts. More of their names were entered as shifted for good, 63.8% against 49.3% elsewhere.

Were women left off more than men?

No table published for Gujarat splits anything by sex, so whether women were left off more often than men cannot be counted. The Chief Electoral Officer's tables give the roll before the revision, the names left off, the draft and the final roll as totals only.

Have the names been put back?

The final roll of 17 February 2026 is 5.6 lakh larger than the draft, at most 7.6% of the names left off, and still 68.1 lakh smaller than the roll before the revision. The names added after the draft count new voters as well as names put back, so how many of those left off are back on the roll cannot be counted. The final roll is published by district only. About 44.0 lakh electors kept on the draft were to be sent a notice to prove their entry, according to the press.

Can I look up my own name here?

No. Only counts are published on this site. To check your own entry, use the Election Commission's voter search.

All questions and answers

GUJARAT 2026

Figures as of 17 February 2026, when the final roll was published.

Elections

1 In 98 of the 182 constituencies, more names were left off than the 2022 winning margin, and in 60 even leaving out the names entered as dead or as enrolled elsewhere.

2 In every one of the twenty closest seats of 2022, the names left off were more than the margin.

3 Seats the BJP won in 2022 lost 15.2 per 100 and the Congress's 10.5. Set against their own districts the two are +0.1 and -0.8 points, so the difference comes mostly from where each party's seats are.

The names left off are from the tables of the Chief Electoral Officer (CEO), who keeps Gujarat's rolls for the Election Commission, as they were published in the press. The 2022 result is from the Election Commission's own statistical report. Sources and method says where each one comes from.

Names left off against the winning margin

The winning margin is the winner's votes less the runner-up's. Each dot is a constituency. Its place across is the margin its winner won by in December 2022, and its height is the names left off its draft roll in December 2025. Above the dashed line, more names were left off than the margin. The election came three years before the revision, so this measures how large the exclusions are against the votes that decide a seat. Nobody can know how anyone left off would have voted. Hover or tap a dot for its name.

In 98 of the 182 constituencies, more names were left off the draft roll than the 2022 winning margin. The seats that lost the most names were mostly not close contests. Across the 182 seats the rank correlation between the rate left off and the margin is 0.44, where 0 means the two are unrelated and 1 means they rise in step, because the city seats that lost the most were won by wide margins. Larger than the margin means large enough to decide a seat, and it says nothing about whether it would have.

How many seats, on each count

Four ways of setting the names left off against the margin, from the widest to the narrowest. The first counts every name left off the draft. The second leaves out the names entered as dead. The third also leaves out the names entered as already enrolled at another place, because those electors can still vote where they are enrolled. The fourth takes the names not entered as dead and counts only the share that would have voted, at each seat's own 2022 turnout, the share of its electors who voted.

98
of 182 seats

Every name left off

64
of 182 seats

Leaving out the dead

60
of 182 seats

Leaving out the dead and those enrolled elsewhere

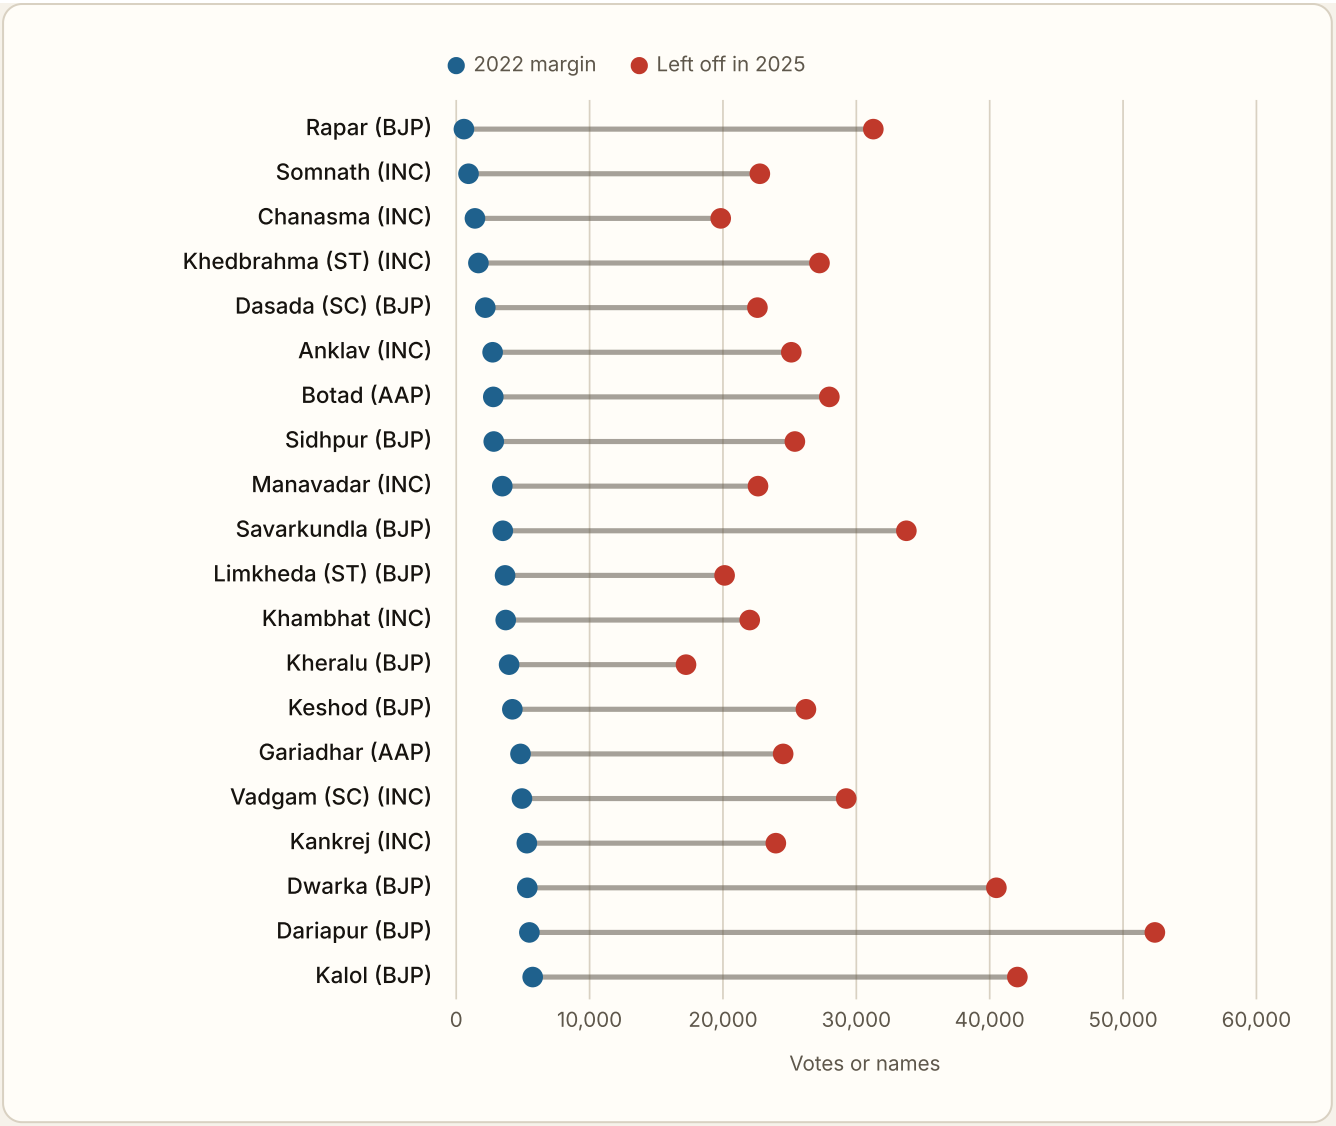

40
of 182 seats

Leaving out the dead, at 2022 turnout

Leaving out the dead, the names left off outnumber the 2022 margin in 64 of the 182 seats, and in 40 at each seat's 2022 turnout. Turnout across the state was 64.8 per cent. In 122 seats, even the names neither dead nor enrolled elsewhere fall short of the margin, so there the runner-up could not have won even if every one of those electors had voted, and voted for the runner-up. Not everyone on a roll votes, so every count here is the most the names could weigh, and the lists cannot show how anyone left off would have voted.

The closest seats

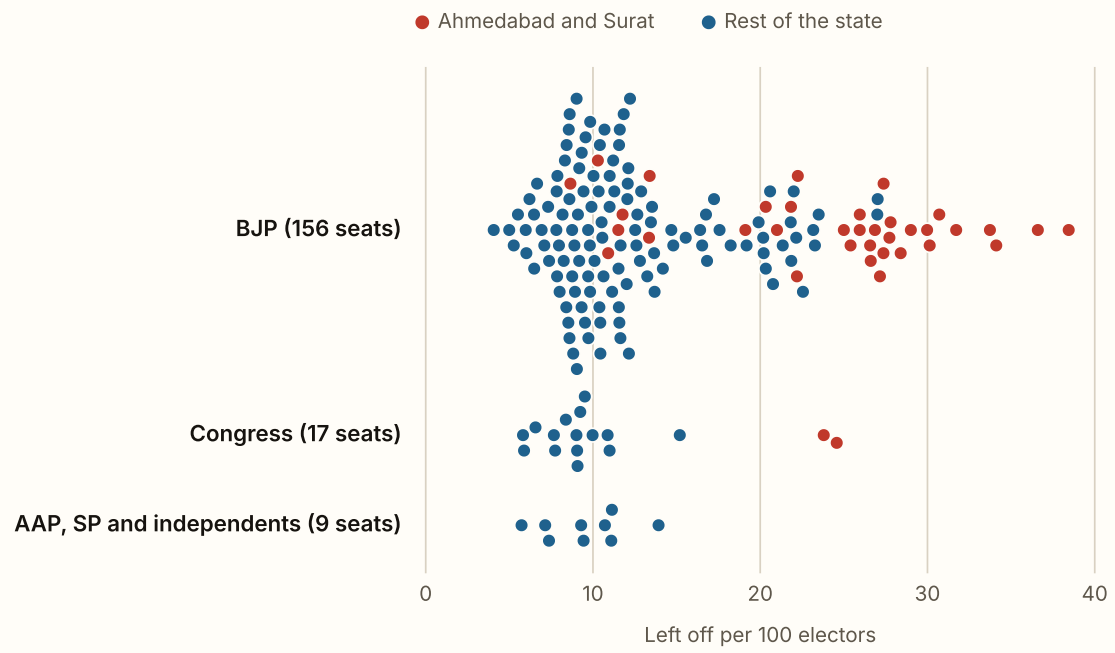

The twenty constituencies with the smallest margins in 2022. For each, one dot is the margin and the other is the names left off its draft roll in 2025.

In every one of the 20 closest seats, the names left off were more than the margin. Rapar was won by 577 votes and lost 31,274 names, and Somnath was won by 922 and lost 22,765. Of the twenty, 10 were won by the BJP, 8 were won by the Congress and 2 were won by the AAP.

The names left off by the party that won

Each dot is a constituency, placed by the names left off for every 100 electors and grouped by the party that won it in 2022. Seats in Ahmedabad and Surat districts are in red. Hover or tap a dot for its name.

The same seats as a table. The column against the district sets each seat's rate against the rate of its own district and averages the difference, so that a party's figure does not just measure where its seats are. A minus means fewer names left off than in the district as a whole.

PARTY THAT WON	SEATS ▾	LEFT OFF PER 100	AGAINST OWN DISTRICT	LEFT OFF MORE THAN THE MARGIN
BJP	156	15.2	+0.1	77
INC	17	10.5	-0.8	15
AAP	5	9.3	-1.7	4
IND	3	9.4	-2.4	2
SP	1	11.1	-2.2	0

Seats the BJP won in 2022 lost 15.2 of every 100 electors, against 10.5 in the Congress's seats and 9.3 in the AAP's. Most of that gap is about where the seats are. The BJP won 35 of the 37 seats in Ahmedabad and Surat districts, where the most names were left off. Set against their own districts, the BJP's seats come out at +0.1, the Congress's at -0.8 and the AAP's at -1.7 per 100. The names left off were more than the margin in 77 of the BJP's 156 seats and in 15 of the Congress's 17.

165	Majura	Surat	85,669	30.1	+4.5	BJP	AAP	1,16,
166	Katargam	Surat	84,976	25.9	+0.3	BJP	AAP	64,62
144	Raopura	Vadodara	82,632	27.0	+2.2	BJP	INC	81,06

The figures are the tables of the Chief Electoral Officer (CEO), who keeps the state's rolls for the Election Commission, as published in the press. The CEO's own website carries none of them. Nothing is split by sex or age, and the final roll is by district only.

Questions about this page

Could the names left off have changed the 2022 result?

In 98 of the 182 constituencies, more names were left off than the 2022 winning margin, and in 60 even leaving out the names entered as dead or as enrolled elsewhere. The winning margin is the winner's votes less the runner-up's. The election came three years before the revision, so this measures how large the exclusions are against the

votes that decide a seat. Larger than the margin means large enough to decide a seat, and it says nothing about whether it would have. Nobody can say how anyone left off would have voted.

Did one party's seats lose more names?

Seats the BJP won in 2022 lost 15.2 per 100 and the Congress's 10.5. Set against their own districts the two are +0.1 and -0.8 points, so the difference comes mostly from where each party's seats are. The BJP won most of the seats in Ahmedabad and Surat, where the most names were left off.

GUJARAT 2026

Figures as of 17 February 2026, when the final roll was published.

Method

1. Gujarat's draft roll of 19 December 2025 left off 73.7 lakh names, 14.5 of every 100 electors on the roll before the revision.

2. Every constituency row adds up two ways, and every column adds up to the printed district and state totals.

3. The printed final roll is 50 electors more than the draft plus the net change, and both are kept as printed.

What is counted

The tables of the draft

The Chief Electoral Officer (CEO) keeps Gujarat's electoral rolls for the Election Commission. The CEO's office printed two tables of the draft roll of 19 December 2025, one by district and one by assembly constituency (AC), the area that elects one member of the state assembly. Each gives the roll before the revision, the names left off under five reasons and the draft roll. These are the CEO's tables as published in the press. They are known from images of the printouts carried by DeshGujarat on 20 December 2025, which appear to have been posted by the CEO's office on X. The CEO's own website carries nothing on the revision. The article's text gives the same state figures as the tables.

The roll before the revision

The tables give each constituency's electors as of 1 October 2025, the roll the revision started from, 5,08,43,436 names for the state. Every "per 100" on these pages is out of it.

The five reasons

The tables enter each name left off under one of five heads. They are death, untraceable or absent, permanently shifted, already enrolled (at another place) and other. The All India pages fold them into three groups for every state, with untraceable or absent, shifted and other counted together. A reason is what the officer wrote down, and nobody checked it.

How the tables add up

Every figure is held by at least one sum. In every constituency the five reasons add up to the names left off, and the roll before less the names left off equals the draft. Each district's constituencies add up to the district's printed total, in every column, and the districts to the printed state total of 73,73,327 left off and 4,34,70,109 on the draft. The district table agrees with the constituency table district by district.

The final roll

The final roll of 17 February 2026 is known from one table, by district, also printed by the CEO's office and published by DeshGujarat on 17 February 2026. For each district it gives the draft, the names added and deleted after it, the net change and the final roll. It has 34 districts, because it prints Vav-Tharad, a district formed from part of Banaskantha, on its own line. On these pages Vav-Tharad is added back into Banaskantha, so that the final table lines up with the 33 districts of the draft. The two together have exactly Banaskantha's draft. Vav-Tharad's draft equals that of three constituencies, Vav, Tharad and Deodar, so those are inferred to be its seats, but no table says so and these pages do not rely on it. There is no final roll by constituency.

Electors the final table does not account for

In every district the net change equals the names added less the names deleted, and every column adds up to the printed state total. But in 7 districts the printed final roll is larger than the draft plus the net change, by 50 electors in all. They are Banaskantha by 1, Ahmedabad by 25, Rajkot by 1, Panchmahal by 5, Dahod by 6, Surat by 5 and Navsari by 7. The state total carries the same 50. The table does not say why. These pages keep both figures as printed. The final roll is the printed final, and the change after the draft is the printed additions less deletions.

The 2022 result

The general election to the Gujarat assembly was held on 1 and 5 December 2022. The winner, runner-up, votes and electors of every seat are from the Election Commission's own statistical report for that election. The candidates' votes are from its detailed results (report 10), and the electors and voters from its constituency figures (report 12). Every seat's candidates add up to its valid votes and NOTA, and every column adds up to the report's state totals, 4,91,63,277 electors and 3,18,79,194 votes polled. The seats by party equal the declared result (BJP 156, Congress 17, AAP 5, independents 3 and Samajwadi Party 1). A published compilation of the same results agrees on the winner's and runner-up's parties in all 182 seats and on the margin in 180. In Viramgam and Wankaner it is one vote out. The margin is the winner's votes less the runner-up's. NOTA, the option to vote for none of the candidates, is never counted as a runner-up.

Ahmedabad after the draft

The final roll was published by district only. For Ahmedabad's 21 constituencies the names added, the names deleted and the final roll are from a table Gujarat Samachar printed on 17 February 2026. The 21 seats add up exactly to the CEO's Ahmedabad row, and in 20 of them the draft plus the names added less those deleted is the final roll. In Danilimda the final roll is 25 more, the same 25 by which the CEO's own Ahmedabad row does not add up.

The map

The map is drawn by district from DataMeet's assembly constituency map (CC BY 2.5 India), with each constituency placed in its district. A map by constituency was not possible. DataMeet's map has no shapes of their own for 20 city seats, Naranpura to Asarwa in Ahmedabad (45 to 56) and Surat North to Surat West (160 to 167). It draws each city as one block with no number, so a map by constituency would leave both cities blank.

Four counts against the margin

A seat is counted on the first measure when the names left off its draft exceed its 2022 margin. The second leaves out the names entered as dead. The third also leaves out the names entered as already enrolled at another place, who can still vote there. The

fourth takes the names not entered as dead and multiplies them by the seat's 2022 turnout, votes polled over electors in the Election Commission's report. All four assume that every elector counted would have voted for the runner-up, which no one can know.

Against the district

Ahmedabad and Surat left off far more names than the rest of the state, and the parties did not win evenly across districts. So each seat's rate is also set against the rate of its own district, and those differences are averaged for each party's seats.

What these tables cannot show

- Whether women, the old or the young were left off more often. No table published for Gujarat splits anything by sex or age.
- How many names each constituency put back. The final roll is published by district only.
- How many names were deleted after a notice and a hearing. The deletions after the draft are given as one figure for each district.
- Whether each exclusion or deletion was right, or how anyone left off would have voted.

Downloads

The constituency and district tables behind every chart are on the Downloads page, which the Downloads button at the top of the page opens.

Analysis of the named lists

This site publishes counts only, never a name. For analysis that looks at named voters, see the Sabar Institute.

The figures are the tables of the Chief Electoral Officer (CEO), who keeps the state's rolls for the Election Commission, as published in the press. The CEO's own website carries none of them. Nothing is split by sex or age, and the final roll is by district only.

Questions about this page

Were women left off more than men?

No table published for Gujarat splits anything by sex, so whether women were left off more often than men cannot be counted. The Chief Electoral Officer's tables give the roll before the revision, the names left off, the draft and the final roll as totals only.

Where do the figures come from?

The figures are the tables of the Chief Electoral Officer (CEO), who keeps the state's rolls for the Election Commission, as published in the press. The CEO's own website carries none of them. They are images of the CEO office's printed tables, by district and by constituency, carried by DeshGujarat, and every row adds up to the printed totals. The 2022 result is from the Election Commission's own statistical report. The method page gives each source.
