SPECIAL INTENSIVE REVISION 2025-26

Tamil Nadu: 97.4 lakh names left off the draft roll

Where the names were left off, on what recorded reason, what the final roll put back, and how the names left off compare with the 2026 result

97,37,831 names left off the draft roll of 19 December 2025

15.2 of every 100 electors on the roll before the revision

211 of 234 constituencies where more names were left off than the 2026 winning margin

35.6 left off per 100 electors in Chennai

What the Election Commission should do

Method and sources

Every constituency

In short

1. The revision left 97.4 lakh names off Tamil Nadu's draft roll, the list published on 19 December 2025 for electors to check and contest. That is 15.2 of every 100 electors on the roll before the revision began.
2. In 211 of the 234 assembly constituencies, the seats of the state legislature, more names were left off the draft roll than the 2026 winning margin, the votes by which the winner beat the runner-up. In those seats the names left off were enough to decide the result. If the names marked dead are left out and the rest are counted at each seat's own turnout, the voters left off still outnumber the margin in 168 seats.
3. 68.2% were entered as shifted or absent, 27.7% as dead and 4.1% as enrolled in more than one place. A reason on the list is what the officer wrote down, and nobody checked it.
4. Chennai lost 35.6 of every 100 electors, more than twice the state's rate. Its 16 constituencies hold 6.2% of the state's roll and 14.6% of the names left off the draft.
5. The final roll of 23 February 2026 was 23.3 lakh larger than the draft. That rise includes new voters, so it comes to at most 23.9% of the names left off. The roll is still 74.1 lakh smaller than before the revision.

The Chief Electoral Officer, who keeps the state's rolls for the Election Commission, has published no split of the names left off by sex or age. So the tables cannot show whether women, the old or the young were left off more often. They show where names were left off, and they cannot show why.

The roll

97.4 lakh	15.2	68.2%	74.1 lakh
left off the draft roll	per 100 electors	shifted or absent	still off at the final roll

Constituency by constituency

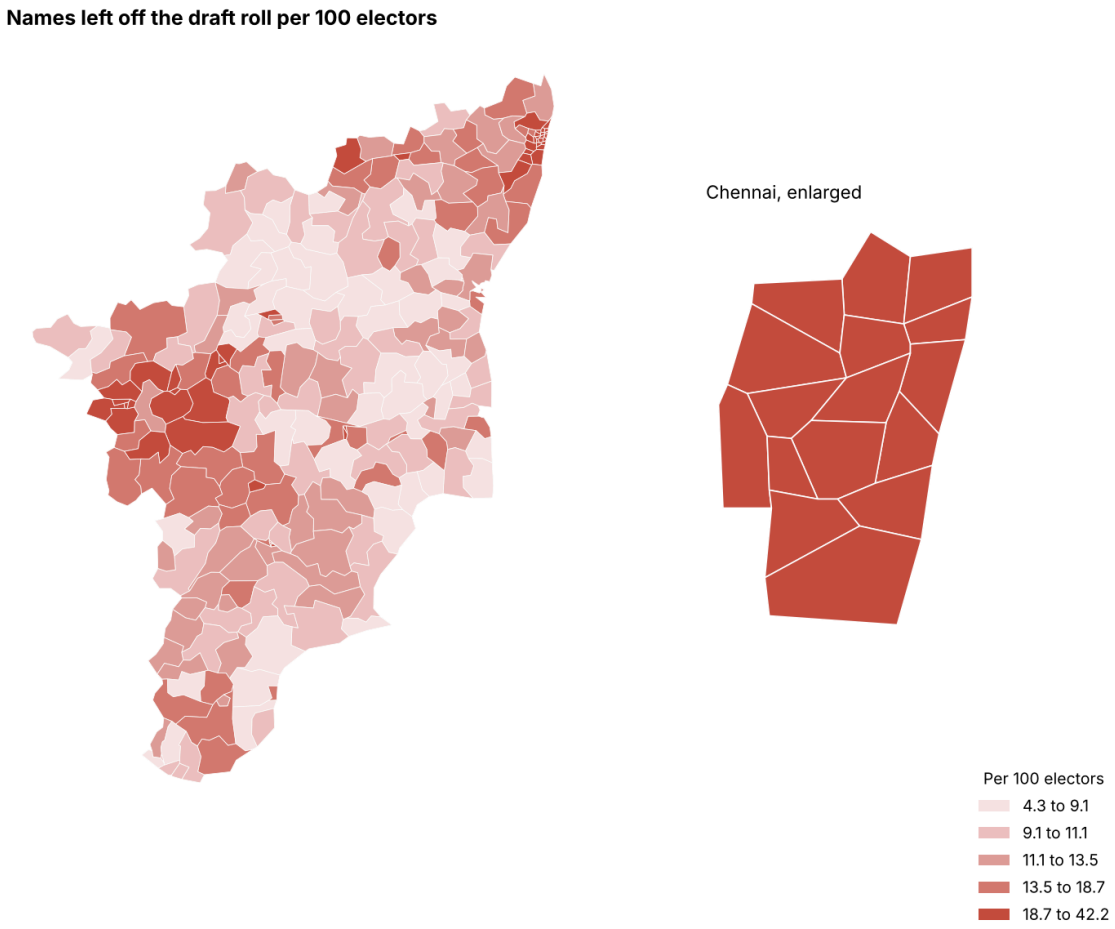

Figure 1. Each constituency shaded by the names left off the draft roll for every 100 electors on the roll before the revision, in five bins with equal numbers of seats. Boundaries from DataMeet's assembly constituency map (CC BY 2.5 India), simplified.

The most names were left off in Chennai, then in Chengalpattu, Tiruppur, Coimbatore and Kancheepuram. By constituency they run from 4.3 per 100 electors in Jayankondam to 42.2 in Anna Nagar.

The roll, step by step

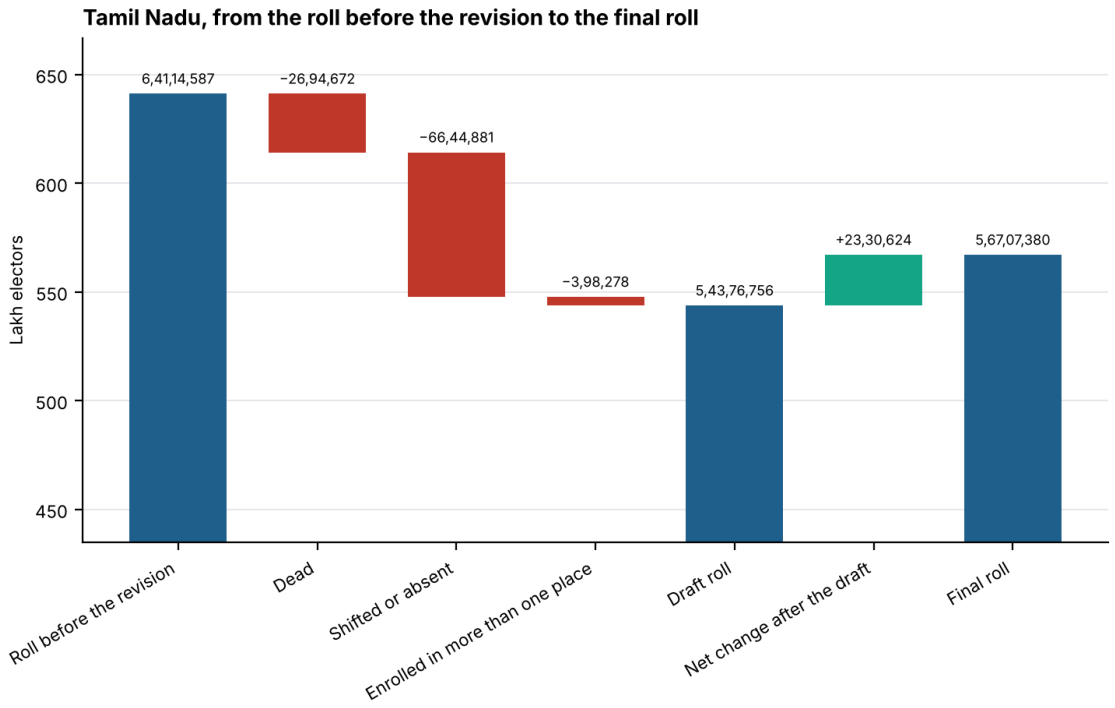

Figure 2. The bars start above zero so that the changes can be seen. The figure on each bar is the count.

The roll before the revision held 6.41 crore names. 97,37,831 were left off the draft roll of 19 December 2025, which held 5.44 crore. Electors could then file claims, on Form 6, to add a name, and objections, on Form 7, to delete one. Together these raised the roll by a net 23,30,624 to 5.67 crore on the final roll of 23 February 2026, the roll that stands after the revision.

Per 100 electors, by district

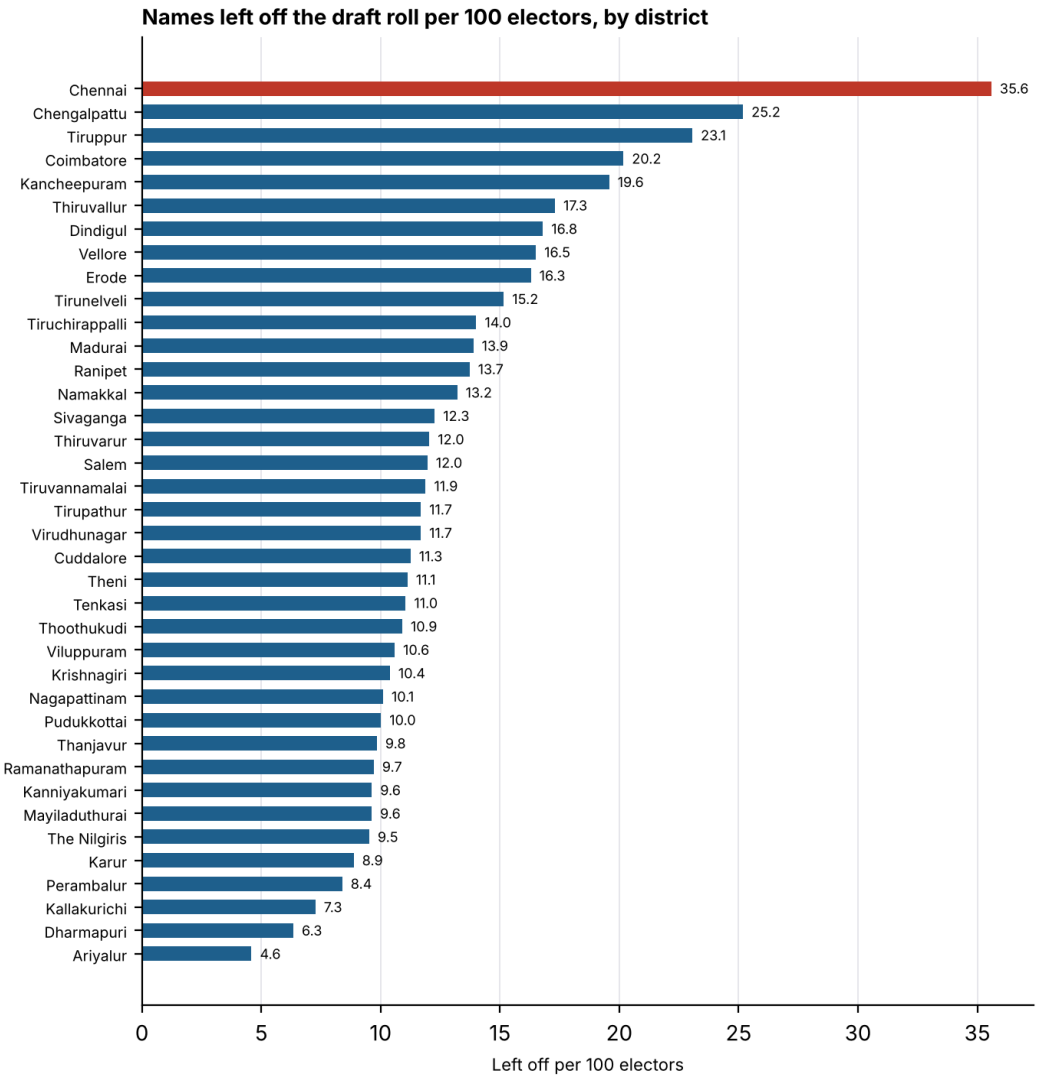

Figure 3. Names left off the draft roll of 19 December 2025, for every 100 electors on the roll before the revision. Chennai in red.

Chennai lost 35.6 of every 100 electors, against 15.2 for the state. The next four are Chengalpattu (25.2), Tiruppur (23.1), Coimbatore (20.2) and Kancheepuram (19.6). Ariyalur lost the fewest, 4.6.

The reasons, district by district

Share of each district's names left off, by reason, %

	Dead	Shifted or absent	In more than one place
Chennai	11	88	1
Chengalpattu	16	81	3
Tiruppur	28	68	4
Coimbatore	18	78	4
Kancheepuram	21	75	4
Thiruvallur	22	75	3
Dindigul	33	61	6
Vellore	22	73	5
Erode	30	66	4
Tirunelveli	39	56	6
Tiruchirappalli	35	62	3
Madurai	25	72	3
Ranipet	32	63	5
Namakkal	34	61	4
Sivaganga	49	47	4
Thiruvarur	36	60	4
Salem	28	67	6
Tiruvannamalai	38	58	4
Tirupathur	30	62	8
Virudhunagar	39	56	5
Cuddalore	36	60	4
Theni	39	53	8
Tenkasi	46	47	7
Thoothukudi	35	61	4
Viluppuram	37	59	4
Krishnagiri	41	53	6
Nagapattinam	32	63	6
Pudukkottai	42	52	6
Thanjavur	53	43	4
Ramanathapuram	44	48	8
Kanniyakumari	37	55	8
Mayiladuthurai	46	48	5
The Nilgiris	34	60	6
Karur	30	67	3
Perambalur	46	47	7
Kallakurichi	40	53	7
Dharmapuri	30	62	8
Ariyalur	50	43	6

Figure 4. Districts in the same order as the figure above, from the highest rate left off to the lowest.

Across the state, 68.2% of the names were entered as shifted or absent and 27.7% as dead. In Chennai the share entered as shifted or absent is 87.7%. Across the 234 constituencies, the rate left off and the share entered as shifted or absent rise together. Their rank correlation, a measure that runs from -1 to 1 and comes near 1 when two things rise in step, is 0.74. So where many names were left off, most were marked as people who had moved or could not be found. Where fewer names were left off, more of them were entered as dead, up to 52.9% in Thanjavur. A reason on the list is what the officer wrote down, and nobody checked it.

Chennai

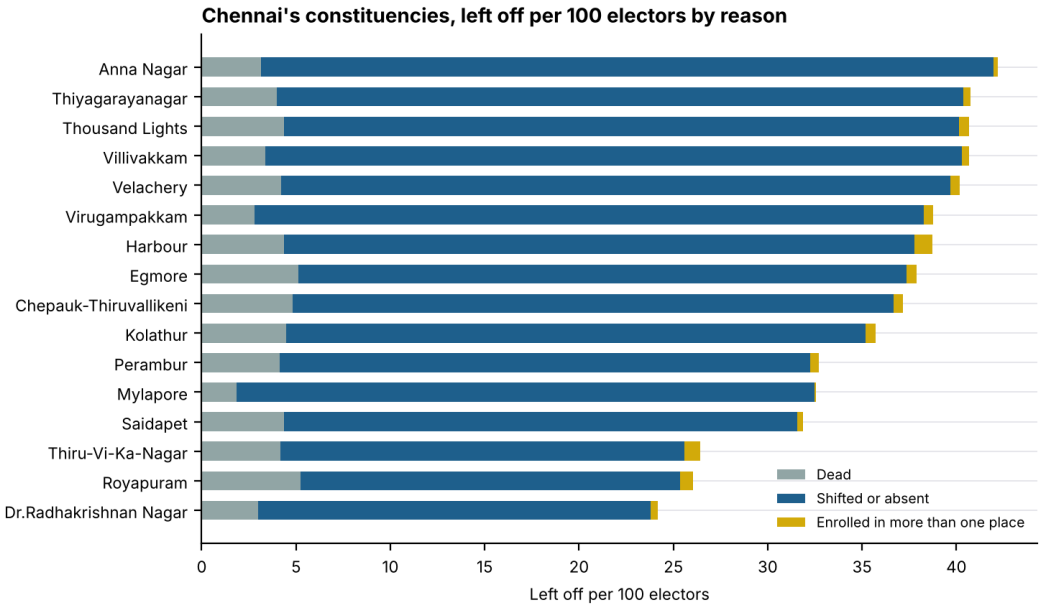

Figure 5. The sixteen constituencies of Chennai district, by names left off per 100 electors on the roll before the revision.

Every one of Chennai's 16 constituencies lost more than 24 of every 100 electors. Anna Nagar lost 42.2, the most of any seat in the state. Chennai holds 6.2% of the state's roll and 14.6% of the names left off the draft, 14,25,018 names in all. 87.7% of Chennai's names left off were entered as shifted or absent and 11.0% as dead. At the final roll Chennai's roll was still 29.3 per 100 smaller than before the revision.

Women

The Chief Electoral Officer has published no split of the names left off by sex, and no roll by sex from before the revision, so women's share of the names left off cannot be counted. What can be counted is the change after the draft.

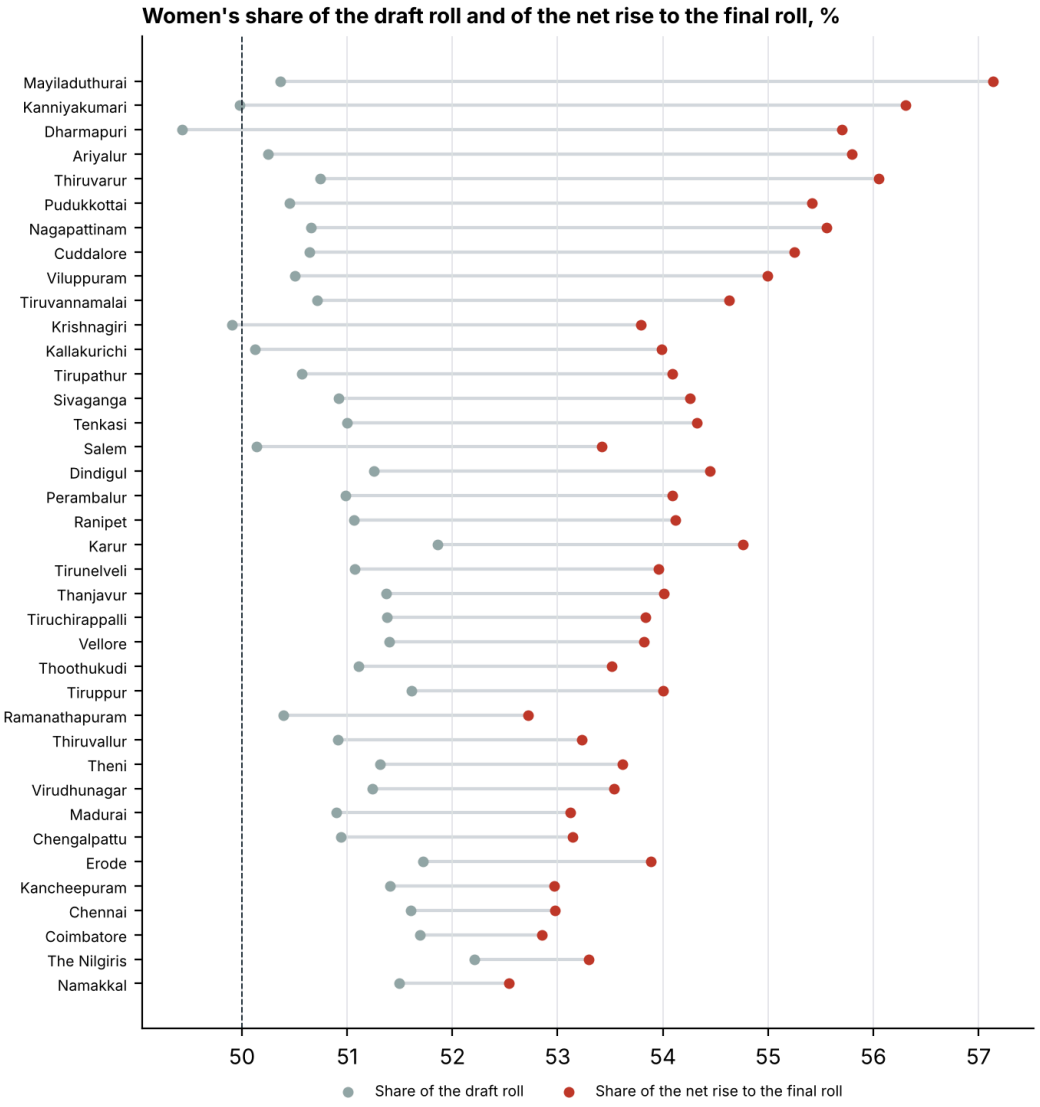

Figure 6. For each district, the grey dot is women's share of the draft roll and the red dot their share of the net rise from the draft to the final roll. The dashed line is half.

Women were 51.0% of the draft roll and 53.8% of the net rise to the final roll. Their share of the rise was higher than their share of the draft in all of the 38 districts. The rise counts new voters as well as names put back, so it does not say how many women's names were restored. Women were 51.1% of the final roll.

After the draft

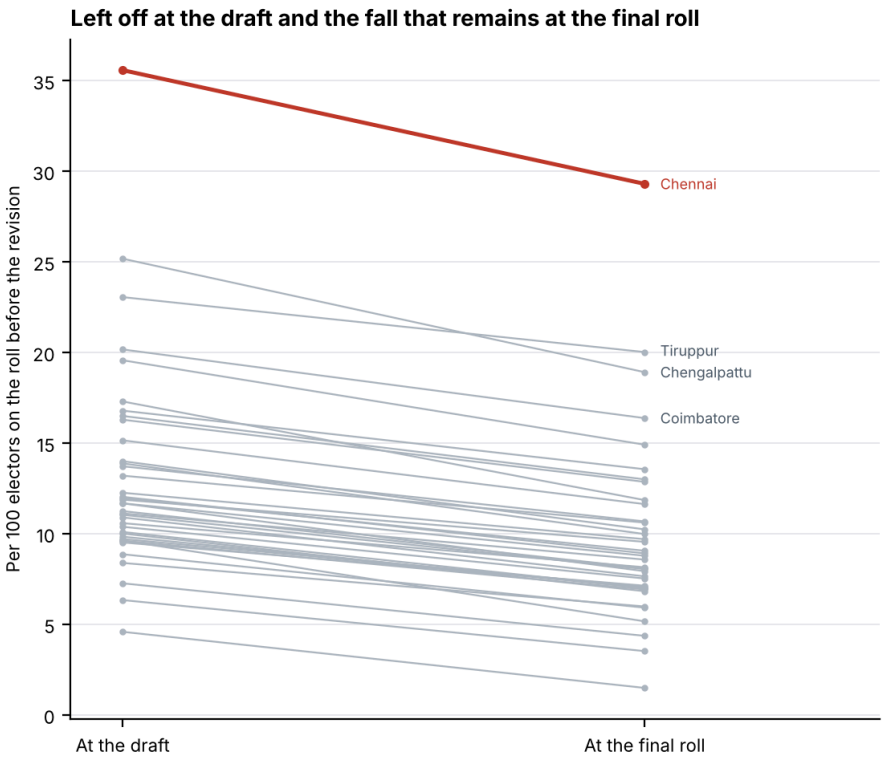

Figure 7. Each line is a district. The flatter the line, the less the roll grew back after the draft. Chennai in red.

The final roll is 23.3 lakh larger than the draft, and still 74.1 lakh smaller than the roll before the revision, a fall of 11.6 of every 100 electors. The rise from the draft is at most 23.9% of the names left off, and it includes new voters. Chennai's roll is 29.3 per 100 smaller than before.

Every district

District	Seats	Roll before	Left off	Per 100	Dead	Shifted or absent	More than one place	Final roll	Net fall per 100

The 2026 election

Names left off against the winning margin

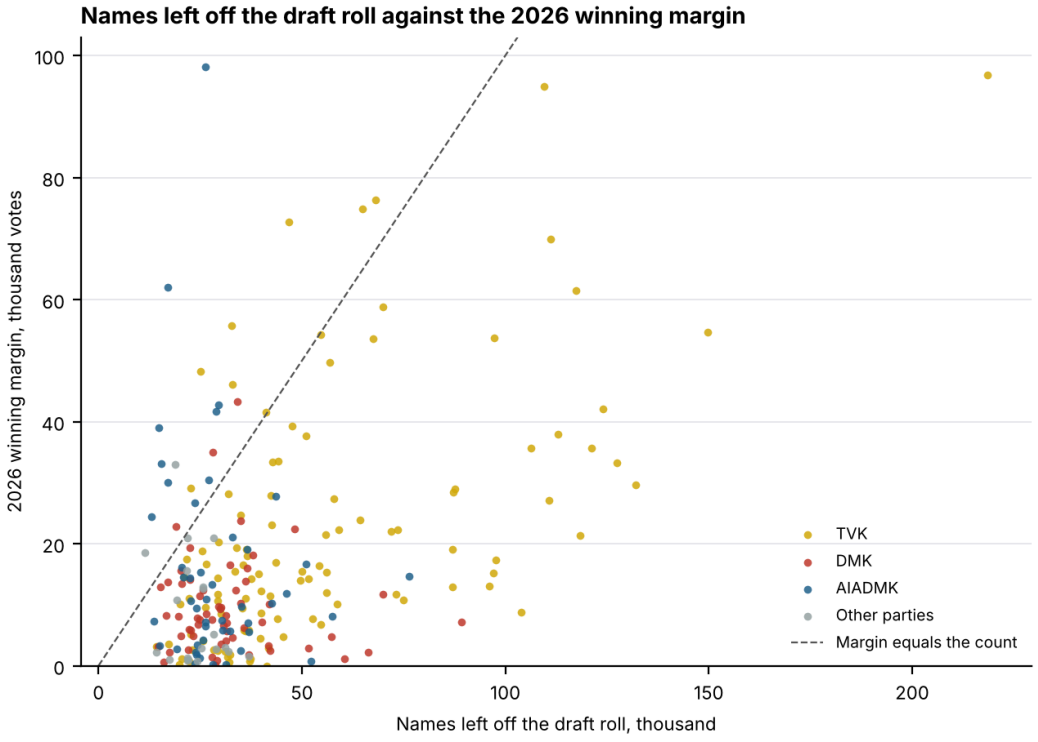

Figure 8. Each dot is a constituency, coloured by the party that won it. Dots below the dashed line are seats where more names were left off than the winner won by.

In 211 of the 234 constituencies, more names were left off the draft roll than the 2026 winning margin. In those seats the names left off were enough to decide the result. Whether they did depends on how those people would have voted, and the lists cannot show that. The rate left off and the margin as a share of votes rise together a little (rank correlation 0.32). The seats that lost the most names were therefore not the closest contests.

How many seats, on each count

211 of 234
every name left off the draft

191 of 234
the net fall at the final roll

168 of 234
the living left off, at the seat's turnout

Three counts set the names left off against the margin, from the widest to the narrowest. The first counts every name left off the draft. The second counts the fall that remains on the final roll. The third leaves out the names marked dead and counts the rest at the seat's own 2026 turnout. Even on the narrowest count the voters left off outnumber the margin in 168 of the 234 seats. In the other 66, the runner-up could not have won even if every living person left off had voted, at the seat's turnout, for the runner-up.

Names left off, by the party that won

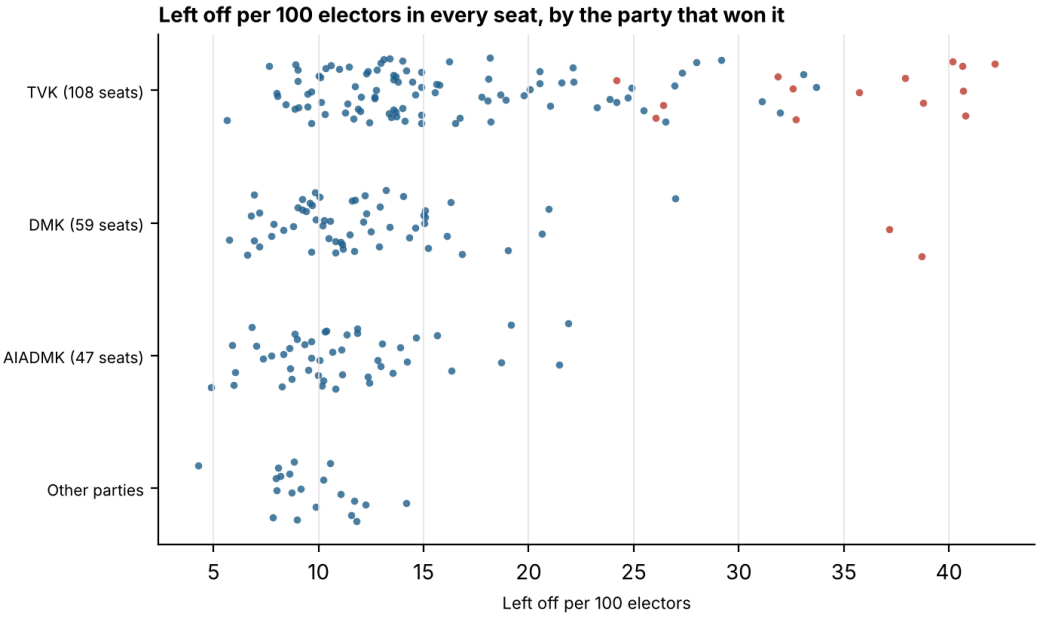

Figure 9. Each dot is a constituency. Chennai's sixteen seats are in red.

Party that won	Seats	Left off per 100	Against own district	Left off over margin
TVK	108	18.8	+0.6	100
DMK	59	12.6	-0.1	56
AIADMK	47	11.3	-1.9	37
INC	5	9.8	-0.7	5
PMK	4	7.8	-0.2	3
IUML	2	10.0	-0.8	2
CPI	2	10.8	-0.4	2
VCK	2	9.1	-1.8	1

Party that won	Seats	Left off per 100	Against own district	Left off over margin
CPI(M)	2	8.5	-1.4	2
BJP	1	8.7	-0.8	1
DMDK	1	12.2	+1.0	1
AMMK	1	14.2	+2.1	1

Seats won by TVK lost 18.8 of every 100 electors, against 12.6 in DMK seats and 11.3 in AIADMK seats. Most of that gap comes from where the seats are. TVK won most of the city seats, and the city seats lost the most names. To allow for that, each seat's rate can be set against the rate of its own district. On that measure each party's seats come out at +0.6 for TVK, -0.1 for the DMK and -1.9 for the AIADMK, where a minus means fewer names left off than the district as a whole. TVK won 108 seats, the DMK 59 and the AIADMK 47, and 163 of the 234 seats changed hands from 2021.

What these tables show and what they cannot

The tables show how many names were left off the draft in every constituency, on what recorded reason, what the final roll put back, and how those numbers compare with the 2026 margins.

- Whether women, the old or the young were left off more often. The Chief Electoral Officer has not published the names left off by sex or age.
- Whether each name was rightly left off. A reason on the list is what the officer wrote down, and nobody checked it.
- How anyone left off would have voted, or why the names left off fell where they did. No list of names left off can show intent.

What the Election Commission should do

97.4 lakh names were left off Tamil Nadu's draft roll, 66.4 lakh of them on an entry that the elector had moved or could not be found. The Election Commission should do five things.

1. Publish the names left off by sex and age for every constituency, with the roll before the revision by sex, so that it can be seen who was left off.
2. Publish the basis for the 66.4 lakh entries marked shifted or absent, including the visits made and the notice given.
3. Publish how many of those added for the final roll had been left off the draft, so that names restored can be told apart from new voters.
4. Explain why Chennai lost 35.6 of every 100 electors, more than twice the state's rate.
5. Publish the roll the election was held on, constituency by constituency, so that turnout can be measured against it.

Method and sources

The names left off the draft roll of 19 December 2025 are the Chief Electoral Officer's table for each of the 234 assembly constituencies, under three reasons, deceased, shifted or absent, and enrolled at more than one place. The constituency rows add up to the district totals and to the state total of 97,37,831. No constituency table of the roll the revision started from has been published, so the draft roll plus the names left off it is that roll, 6,41,14,587 in all, and every figure per 100 is out of it. That sum equals the state total announced with the draft.

The final roll of 23 February 2026, by constituency and by sex, is also the Chief Electoral Officer's table. The rise from the draft to the final roll is the names added on claims less those deleted on objections, so it counts new voters as well as names put back, and it is the most that can have been restored.

The 2026 winner, runner-up and margin for every seat are from the Election Commission's constituency result pages, checked against its state-wise pages. Turnout is the votes polled over the final roll, because the result pages carry no electors. The 2021 result is from the Election Commission's statistical report, through a published compilation of it whose seat totals equal the declared result.

Three counts are set against the margin. A seat is counted on the first when the names left off the draft exceed the 2026 margin, and on the second when the fall from the roll before the revision to the final roll exceeds it. The third leaves out the names marked dead and multiplies the rest by the seat's turnout. It still assumes every one of those voters would have chosen the runner-up, which no one can know. Each seat's rate of names left off is also set against the rate of its own district, and those differences are averaged for each party's seats, because Chennai and the districts around it lost far more names than the rest of the state and the parties did not win evenly across districts.

The map uses DataMeet's assembly constituency map, licensed CC BY 2.5 India. Only counts are published, never a name, EPIC number or address.

Every constituency

No.	Constituency	District	Roll before	Left off	Per 100	Dead	Net fall per 100	Won 2026	Margin	Over margin
